ENGLAND NOW IS OBJECT OF HITCH-HIKERS

Braffier and Brown Refused Admission to U.S.; May Head For Calgary

Refusal by the U.S. Immigration Office to allow two Victoria hitch-hikers to enter the United States has necessitated a change in the plans of William Braffier and J. Brown, 938 Yates Street, who announced yesterday they were going on a tour of the continent with the sign, "See Victoria, the city of sunshine and flowers," painted in brilliant colors on their backs. The trip was to have included southern California, Florida and New York, with letters of introduction from Mayor Anscum and the Victoria and Island Publicity Bureau to Mayor Jimmy Walker, New York City, state governors and other U.S. dignitaries.

All the bodies were recovered. Those O. B. Greer of St. Marie, engineer, and Pilot P. A. Hutton, Toronto, former instructor at the Toronto flying club, were recovered yesterday and the bodies of these L. Rummel of Stratford, Ont., collector, and J. V. Stewart, Toronto, recently-appointed district forester here, were recovered.

EN IN BY PLANE
Pilot George Defahay, Pembroke, Ont., for whom the occupants of the plane had been searching, as the only eye-witness of the accident, and his companions had been searching for Delahaye since early Tuesday morning. He was sighted aroond on an island and the big ship swooped down to make a landing when something went wrong. Out a vertical bank the plane crashed with terrific force about fifteen feet from shore.

RED PERRY BEATS LOTT

British Davis Cup Tennis Player Beats U.S. Star in Newport Tournament

Newport, R.I., Aug. 19.—Frederick J. Perry, British Davis Cup star, had a two-set lead on George Lott, American internationalist, to-day, when a heavy shower interrupted their quarter finals play in the Newport Casino tournament.

The downpour came after five minutes and the players resumed the match. Perry continued his accurate play at the net, rushing Lott and broke in service twice to take the deciding set for a 6-1, 6-4, 6-4 victory that placed him in the semi-final round.

Other results: Ellsworth Vines, Pasadena, Calif., defeated Francis X. Shields, New York, 6-4, 6-3, 6-0. John Van Ryn, Philadelphia, defeated Bryan Grant, Atlanta, Ga., 6-1, 6-3, 6-2.

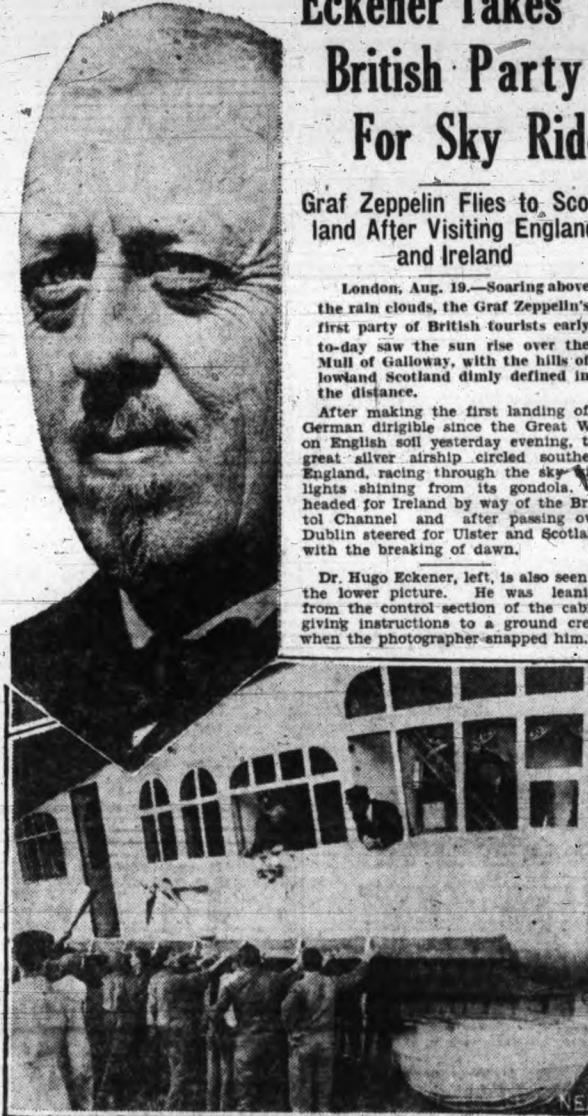

BIG WAVE DROWNS THREE AT ATLANTIC CITY, N.J.

VANCOUVER MAYOR, IN HOSPITAL, GAINS

Vancouver, Aug. 19.—Mayor Louis Taylor was reported at St. Paul's Hospital to be "little better" to-day. He spent a good night. Hospital authorities stated that once he had been treated such a step is contemplated.

WHARF FIRE IS SOON PUT OUT

Vancouver, Aug. 19.—Firemen were called this morning to extinguish a small blaze on the roof of the new C.N.R. dock at the foot of Main Street here. Slight damage was done. Apartments from fire halls Nos. 1, 2 and 3, the Knickerbocker Hotel, whose two sisters were on the beach at the time. The high seas, believed to have been caused by a storm at sea, swept in without warning.

Eckener Takes British Party For Sky Ride

Graf Zeppelin Flies to Scotland After Visiting England and Ireland

London, Aug. 19.—Soaring above the rain clouds, the Graf Zeppelin's first party of British tourists early to-day saw the sun rise over the hills of Galloway with the hills of lowland Scotland dimly defined in the distance.

After making the first landing of a German dirigible since the Great War on English soil yesterday evening, the great silver airship circled southern England, racing through the sky with lights shining from its gondolas. It headed for Ireland by way of the Bristol Channel and after passing over Dublin steered for Ulster and Scotland with the breaking of dawn.

Dr. Hugo Eckener, left, is also seen in the lower picture. He was leaning from the control section of the cabin, giving instructions to a ground crew, when the photographer snapped him.

NEW ZEALAND NOW BARS EXPORT OF SWEEPSTAKE MONEY

Wellington, N.Z., Aug. 19.—The Government of New Zealand will do its utmost to check participation by residents of New Zealand in sweepstakes conducted abroad. According to an announcement to-day, the postal authorities will intercept all communications in connection with the Irish Free State Hospitals sweep.

CUT IN GERMAN REPARATIONS IS NEWEST MOVE

International Bankers' Committee's Report Studied in All Capitals To-day
Reparations Declared Great Obstacle to World Progress; High Tariffs Scored

Canadian Press
Berlin, Aug. 19.—News from Basel that the Wiggin committee had recommended immediate revision of reparations was received to-day with intense interest, but with apprehension as to the attitude of France.

Members of the joint disillusionment which followed the announcement of the Hoover moratorium plan two months ago, tended to dampen any tendency toward over-optimism, although the committee's declarations were received with consternation of the viewpoint long stressed by the German Government and its economists, that political debts are enemies of international financial stability.

The first afternoon paper of the press, the democratic Berliner Zeitung, dropped its front page to a summary of the report with an introductory editorial characterization of it as the most important document on the German economic situation since the experts' report that led to the Dawes Plan.

PROBLEM FOR BANKERS

London, Aug. 19.—The British Foreign Office had not been officially acquainted this morning with the full report of the Wiggin committee recommending revision of war debts and reparations.

Pending official word from Basel, there was no comment here on the report. It was said, however, that the whole matter might now be regarded as a problem which involved the banks and the financiers primarily and not the public.

WALL STREET PLEASED

New York, Aug. 19.—An informal comment in Wall Street banking circles indicated considerable satisfaction to-day with the report of the Wiggin committee on German finances.

The report of the committee was closely in line with opinions which have already been expressed informally by prominent bankers.

Wall Street feels that while the Young Plan payments are to be resumed in about ten months no longer term loan to Germany is possible. Bankers foresee little prospect of sufficient time for revision of world business conditions to make revision of payments feasible on the old basis.

Prominent bankers have pointed out that while the problem of some new deal at the end of one-year moratorium hangs over the situation, German bonds are unlikely to find a ready market, and the prospect of funding a large short-term indebtedness remains decidedly cloudy.

ENDING DISPUTES

The part of the committee's report dealing with the question of settling European political disputes was in line with opinions expressed in Wall Street at the time the Reichsbank unsuccessfully sought a \$500,000,000 loan a few weeks ago. At that time New York bankers were distinctly unenthusiastic over entering into any plan, the beneficial effects of which might be lost through political friction.

C.P.R. OFFICIAL LOOKING OVER SALT SPRING

E. F. L. Sturdee Comes From Vancouver to Make Visit; Resort Development Mooted

Canadian Press
In line with the Canadian Pacific Railway's policy of keeping in touch with new tourist and resort developments on the Coast, E. F. L. Sturdee, district passenger agent of the C.P.R. in Vancouver, came over to Victoria to-day to join the Chamber of Commerce's excursion party on its visit to Salt Spring Island on the motor ferry C. P. Ferry.

Mr. Sturdee was the special guest of directors of the Chamber of Commerce.

Much interest was attached to Mr. Sturdee's presence in the party in view of the C.P.R. to enter the Salt Spring Island field with a ferry service and resort development. Other C.P.R. officials have recently been investigating the possibility of Salt Spring as a summer resort, being to Victoria what Bowen Island and the Howe Sound resorts are to Vancouver.

The success of the Bowen Island hotels and other developments have led to the suggestions that the C.P.R. should expand its operations successfully at Salt Spring Island, which is being half way between Vancouver and Victoria. Besides its beaches, bays and harbors, with warm bathing water, the island is large enough for motor touring and has a variety of mountain and lowland lakes to provide more than any other Coast resort on the Canadian side.

THE PER CENT

The Herald said Premier MacDonald's proposal for meeting the financial crisis included a general 10 per cent tariff for revenue purposes.

Hospitals Partly Crippled When Transmission Line Broken By Dynamite Gang

Many Plants in Montreal Forced to Operate on Reduced Power as Result of Blowing Up of Towers Carrying Hydro Wires; Union Leaders Say Men on Strike Know Nothing of Men Who Did Dynamiting and Are Hunting Them

Canadian Press

Montreal, Aug. 19.—Only operations of the most pressing urgency were carried out in Montreal hospitals to-day after dynamiting of two hydro-electric transmission line towers on the outskirts of the city had greatly curtailed the power available. The powerful lights and other electrical appliances necessary for surgeons in operating rooms would not function properly, with the power available from emergency resources of the Montreal Light, Heat and Power Consolidated, and nearly all city facilities relying on electrical energy were crippled to some extent.

Arrangements were being made to bring into use steam generating electrical plants long disused since the coming of hydro-electric power, while the sister cities of Hankow, Wuchang and Hanyang, and further engulfing sweepings millions.

Previously having swept away the homes of 30,000,000 persons, leaving 10,000,000 of them destitute, in a rampage through the city, the rebels touched a level of fifty-three feet six inches here to-day, one inch higher than the record level of Monday.

The big Chikao dyke, protecting Hankow's western suburbs from the river, collapsed and sent a wall of water through the native industrial district. Several thousand persons were drowned in the water that swept the locality and inundated big flour, silk and cotton mills. There was too much chock to count the dead.

Virtually all of Hankow was under water from five to twenty feet deep. Big river junks sailed through what once had been city streets, picking up helpless victims and what valuables remained.

SEVERAL ATTACKS

Instances of dynamiting of power lines have been occurring with alarming frequency since the strike, started some two weeks ago, of a group of 175 linesmen of the Montreal Light, Heat and Power Company, but officials of the power company reiterated to-day their absolute ignorance of the culprits and expressed their belief the strikers were responsible for the acts of sabotage.

The strike is for recognition of the union.

Yesterday evening a power transmission line at Sumnerdale, a western suburb of Montreal, and a large section of the Lakeside colony was in darkness for nearly three hours.

UNION STATEMENT

J. W. McCallum, general secretary of the Canadian Electrical Trades Union, made up of Montreal linesmen and helpers, to-day stated local union officials know "absolutely nothing" of the dynamiting of the power lines.

"We disclaim any responsibility," he said. "We have had nothing to do with it. And we are keeping track of the actions of our men day and night. The men are patrolling the city in groups day and night; I was out last night myself. There are twenty crews working from 3 o'clock in the afternoon until 3 o'clock in the morning, trying to get hold of the persons responsible for the trouble."

PESTILENCE RAGES

The strike is for recognition of the union.

Yesterday evening a power transmission line at Sumnerdale, a western suburb of Montreal, and a large section of the Lakeside colony was in darkness for nearly three hours.

UNION STATEMENT

J. W. McCallum, general secretary of the Canadian Electrical Trades Union of Montreal, made up of Montreal linesmen and helpers and the power company officers were tentatively scheduled for late this afternoon.

With its greatly handicapped resources, from to-day's services the company expressed fear further demonstrations to-night might cut the city off from all power sources. Repair men were working feverishly to repair the damage, while the company's force of guards was being hastily reinforced.

MEET IN CONFERENCE

A meeting of officials of the Canadian Electrical Trades Union of Montreal, linesmen and helpers and the power company officers was tentatively scheduled for late this afternoon.

With its greatly handicapped resources, from to-day's services the company expressed fear further demonstrations to-night might cut the city off from all power sources. Repair men were working feverishly to repair the damage, while the company's force of guards was being hastily reinforced.

Sea Monster Is Myth But Whale Real

Denizen of Deep Which Alarmed Cordova Bay Party Only a Killer Whale, Says Capt. William Heater and George Russell; Three of Them Paid Visit to Picnic Resort Sunday.

George Russell, of the post office at Cordova, told the mystery of the "sea monster" reported at Little Cordova Bay on Sunday.

"Sure I saw it," he said to The Times after reading T. K. Scott's report in yesterday's paper. "But there was no real about it. What Mr. Scott saw was a killer whale. There were three whales in Cordova Bay on Sunday swimming themselves along the beach front searching for smaller fish, which are their food. One was a killer and the other two, I think, were humpbacks."

Mr. Russell explained that the effect seen by Mr. Scott of a long projecting arm" was probably nothing more than the killer's fin.

"I think they saw it well," continued Mr. Scott's statement, "but the 'sea monster' kicked up a big wake as it raced away at about twelve knots. One moment we saw them off Gordon Head and the next time we looked they were inside Seal Rock. There is plenty of small fish in the bay now, and that is what the killer whale feeds on."

Capt. William Heater, veteran whaler, told The Times this morning to say that what Mr. Scott saw was undoubtedly a killer whale. He has seen plenty of them.

Hoover Names Relief Head

Washington, Aug. 19.—President Hoover to-day appointed Walter S. Gifford, president of the American Telephone and Telegraph Company, to set up and direct such organization as may be desirable to cooperate with national, state and local agencies dealing with unemployment relief.

FOUR-YEAR TERM ON DRUG CHARGE

Mah Chong, Chinese, Pleads Guilty to Possession of Opium

Entering a plea of guilty, Mah Chong, Chinese, was sentenced by Magistrate George Jay in City Police Court this morning four years' imprisonment and a fine of \$200, or in default imprisonment for months for being in possession of opium.

Mah Chong was arrested last week by Detective-sergeant L. J. Black of the Royal Canadian Mounted Police. Sergeant Black told the court the accused had sold several decks of opium to a Chinese police informant. Finally the police served the process on Fisgard Street, where the accused was employed and arrested him.

T. M. Miller, defence counsel, pleaded for a light sentence in view of the fact that the accused would be released at the end of his term. The magistrate held that there was no cause for a light term and Chinese must learn the drug traffic was illegal.

R. A. Wootton prosecuted.

Lindbergh Plane Rides In Lee of Rocky Pacific Isle

Memorial, Japan, Aug. 19.—Twice forced down in attempting to fly 200 miles from Petropavlovsk Kamchatsk, Peninsula, Siberia, to Memuro, Col. and Mrs. Charles A. Lindbergh apparently were spending the night afloat in their pontooned plane on the sheltered side of a foraging and uninhabited island about which the waves were high.

They landed on the lee side of Ketol Island at 4:45 p.m. to-day (2:45 p.m. Victoria time), after flying over the central portion of the Kurile Island chain trying to avoid a big fog bank which loomed ahead of them after they had flown more than half way to Memuro.

Through the fog they found the problem of spending the night afloat on the ocean currents which even sturdy ships approach with caution, or the alternative of attempting to reach shore and camping on a strip of land to which only the hairy Ainu lay claim.

CUT IN GERMAN REPARATIONS IS NEWEST MOVE

(Continued from Page 1)

FRENCH KEENLY INTERESTED

Paris, Aug. 19.—Summaries of the Wiggin committee's report issued at Basel aroused the keenest interest in government circles here to-day. The recommendations concerning war debts and reparations were of primary interest, but those bearing on tariff walls and closer co-operation between France and Germany also were scrutinized.

Since only a summary of the report has reached here, the government and the press are withholding comment until the full text is available. The forecast in government quarters, however, was that the fate of the report would depend on the reaction at Washington.

PROSPERITY MOVE

Basel, Switzerland, Aug. 19.—A recommendation that the entire structure of inter-governmental war debts and reparations be revised as the first step toward the return of world prosperity was made to-day by the Wiggin bankers' committee.

The committee was set up by the Bank for International Settlements at the behest of the seven-power conference in London to investigate German reparations needs. It was headed by Albert H. Wiggin of New York, chairman of the board of the Central National Bank, and was composed of representatives of the ten leading banking nations in the world.

Its report criticizes political differences existing between Germany and her neighbors and urges that current disputes be cleared up in order

HIP'S MAIL BAG ROBBED

lish Registered Mails on
S. Liner Leviathan Looted
When Ship at Sea

New York, Aug. 19.—A mysterious mail robbery was disclosed by office authorities Monday with the United States liner Leviathan.

pouch of British registered parcels, led from Nassau, Bahamas, was cut open, looted of seven pieces mail and carefully tied up again.

authorities linked the robbery with a several weeks ago of \$25,000 in

mail to you regularly after reach age 50, 55, 60 or 65, which you select? You would like to it now, perhaps, and have a capital sum needed to buy such income the Canada Life will guarantee it to you at once. But if you can't the capital, you can arrange that you will have that income on.

pose you are earning \$100 a month may be \$150, \$200 or more. What is there is a part of that that you want continued.

you were not earning, how much did continue? That is, how much your income would go on, no matter you earned a salary or drew pay or? For many people the answer old have to be: "No, very much!"

Another man bought a policy which paid him \$100 a month when he reached age 65, but he died at age 50. His widow has been drawing the \$100 a month for years, and she says it seems as though he brings it to her each month.

We have hundreds of similar cases we could mention. There is but one sure way: How you can provide a similar income is told in our booklet "Getting the Income You Want." Why not send for it now?

THIS COUPON WILL BRING YOU VALUABLE INFORMATION

Canada Life Assurance Company,
Toronto, Ont.

husk obligation on my part, please send me by mail your booklet "Getting the Income You Want."

Mr. or Miss

FEDERAL RELIEF RULES STATED BY MINISTER

Highway Construction One of
Chief Measures For Employ-
ment, Says Robertson

People Urged to Aid in Meet-
ing Clothing Needs of
Jobless

Canadian Press
Ottawa, Aug. 19.—General regulations governing the unemployment relief measures to be undertaken by the government have been made public. An announcement setting forth the specific powers vested in the Minister of Labor in connection with those measures was given out, together with a statement by Senator Gideon Robertson, Minister of Labor, yester-
day evening.

Enlarging on the regulations in ex-
plaining the various relief powers,
Senator Robertson said all members of the House of Commons had been invited to furnish the government with suggestions regarding federal undertakings that might usefully be carried out in their constituencies under the direction of the Minister of Public Works. The operations involved in the construction of public buildings and wharves, and repairs to both, and generally needed federal works of all descriptions.

"Such undertakings," continued Senator Robertson, "also embrace such construction as might be conducted on behalf of the federal and provincial governments, under the direction of the provincial authorities. In such cases there would be proper federal supervision in order to protect federal interests. Those works it is expected, will largely consist of highway construction throughout Can-
ada.

TRANSCANADA HIGHWAY

The federal government proposes and offers to share in the cost of the construction of the Trans-Canada Highway on the basis of sharing 50 per cent of the cost thereof. Each provincial government will be required to define by order-in-council the route and the point of contact with the adjoining provinces. The Dominion government proposes also to participate substantially in the cost of building the highway wholly within the province, may also be assisted as to construction costs on the basis agreed on with the provincial authority, and as need and circumstances justify.

MUNICIPALITIES TO SHARE

"A third feature of the government's proposals is that any municipality desiring to carry on local improvement works of any sort with federal and provincial aid shall submit its plans to the minister, together with its provincial government, they agreeing together what portions of the expenses entailed thereby would be borne by the municipal and provincial authorities. Each provincial government is being invited to confer with the Dominion Minister of Labor respecting both these provincial and municipal undertakings.

REGISTRATION LISTS

"Such procedure," continued Senator Robertson, "will accommodate the varying intensity of unemployment in different parts of the Dominion. All provinces have already been asked to supply as promptly as possible, and not later than the end of the present month, statements showing the number and, approximately, accurate estimates of the number of unemployed in each province.

HOURS OF WORK

"The federal government universally supports the well-organized standard eight-hour day should be adopted by all parties, and that a maximum day of eight hours should be given all relief undertakings. Except for cause shown, satisfactory to the Minister of Labor, any variation from this principle must be justified.

"The provincial and municipal authorities will fix the rates of compensation to be paid on works initiated by them, the federal government fixing the wage rates only on purely federal undertakings. All contracts are to provide that materials used shall be the products of Canadian mills, factories or labor, wherever available. The government desires hand labor should be used to the maximum possible extent.

"The rates they will fix shall not exceed those prevailing for the class and kind of work in the district where that work is performed, providing such rates are fair and reasonable. In work let by contract, preference shall be given to Canadian construction firms established and operating in Canada prior to January 1, 1931.

NO DISCRIMINATION

"All workmen employed on relief undertakings shall be residents of Can-

ada, and from the locality nearest where the work is being performed. The legislation provides that discrimination shall be exercised or permitted in the employment of, and granting direct relief to, any person who is a British subject, by reason of race, religion or political affiliation.

"The Minister of Labor will direct as to federal inspection and supervision necessary, and the federal government will bear the costs thereby involved," said Senator Robertson.

DIRECT RELIEF

"In western Canada particularly, where through crop failures and drought it may be impossible to provide employment, the government will direct relief will in most instances doubtless have to be given. This is especially so in those parts where crops of both grain and feed have totally failed. The federal government's contribution in this regard must necessarily be on the basis of need and as so largely affects agriculture, the federal government's interests will be directed through the minister of that department.

RAILWAY WORKS

"Through the Board of Railway Commissioners the opportunity for substantial assistance to relieve unemployment by the further elimination of grade crossings which would provide protection against accidents and injuries as well as creating employment, will be embraced. Some twenty-five crossings will be removed for the benefit of the public. The cost of this will be met by the federal government.

"The carrying on of measures to

provide employment in national parks areas will be under the particular direction of the Minister of the Interior.

CLOTHING NEEDED

The minister also pointed out that due to the extended period of depression and the want of resources, the manufacture of personal clothing requirements will be acute this coming winter.

He therefore urged co-operation of all classes of the people with organizations such as the Red Cross, and other similar associations, in providing and contributing goods and funds in order to furnish the destitute with these articles.

"The co-operation of business interests and private citizens proposing to erect building of all kinds is specially asked for at this time, in order to promote restoration of normal conditions," said Senator Robertson. "Construction costs, interest rates and labor supply may not be obtainable under more favorable conditions than is the case at present."

"From time to time public an-

nouncements will be made of works authorized and undertaken."

CHANGE OF SCENE FOR TRIALS URGED

Associated Press

Hartford, Ky., Aug. 19.—The Haland County court, faced with a general economic depression, as Circuit Judge D. C. Jones described it in changing the grand jury, was pictured by W. A. Brock, state attorney, yesterday as too reverent to permit the trial here of men facing death in the electric chair for slayings in the long-drawn-out labor controversy.

In a motion seeking a change of venue for fifteen of the thirty men indicted for murder as the result of a clash at Evarts, May 5, in which four died, Brock said there would be danger of mob violence if their trials were held here. There was too much feeling, he said, for an impartial jury to be drawn.

The motion was set for hearing next Monday, and M. F. Hall, of defense counsel, said the defense would oppose the transfer of the cases, but would demand Judge Jones disqualify himself on the ground he is connected with coal operators. The state court of appeals upheld Judge Jones last spring when he declined to disqualify himself in the labor cases.

INDIA CIVIL SERVICE SCORED NOW BY GANDHI

He Says It Is Enemy of India
Nationalist Congress

Canadian Press

Amritsar, India, Aug. 19.—Mahatma Gandhi to-day charged the Indian Civil Service— which Rt. Hon. David Lloyd George described as the backbone of India's administration— with recognizing the right of India to full freedom and as an enemy of the Nationalist Congress.

"It have too great regard for their ability, powers of organization and their influence on the British public opinion," wrote Gandhi. "I think without this wholehearted co-operation and blessing a humble person like myself could possibly get anything from London. Therefore, until the members of that service are converted there is no hope for the Congress to enter on negotiations for full freedom. We must go through further suffering, however costly a progress that may be."

Amritsar, India, Aug. 19.—Mahatma Gandhi yesterday evening issued a denial that he had any influence over the head of the Indian Civil Service.

The denial was part of his final letter to his correspondence with Earl Willingdon, Viceroy of India, concerning the controversy which resulted in his resignation from the impending Round Table Conference on Indian Affairs in London.

The letter, made public by Gandhi, set forth the Mahatma had asked, as a matter of right, for the establishment of a board of arbitration to pass on his allegations that the Delhi pact, his last, had been violated by Britain. "Delhi," he said, "is wholly untrue."

Mr. Henry pointed out that designation of the route in each province was to be left to the provincial governments. In a statement on unemployment relief at Ottawa yesterday evening Senator Gideon Robertson, Minister of Labor, confirmed the understanding that the route in each province was to be left to the provincial governments.

Mr. Henry would not admit the route mentioned by Premier Bennett had the unofficial approval of the Ontario Government. So far as official action was concerned, the Ontario cabinet had not passed any order-in-council, and had not even decided formally on a plan. Mr. Henry said: "The cabinet has not discussed it." he said. "I think Mr. Bennett must have been misquoted."

BACK TO THE LAND

WHETHER THE ANALYSIS OF THE present economic situation and the remedies submitted by Mr. E. C. Mayers, K.C., prominent barrister, to a group of Victoria businessmen yesterday meet with general acceptance or not, they furnish food for serious thought, and as such should be a useful contribution to the discussion and consideration of the most pressing problem of our time. Mr. Mayers contends that conditions prevailing now are different in their origin and nature from those which marked other economic recessions; that the world is in a stage of industrial revolution which will involve entirely new readjustments; that the problem of unemployment can not be permanently settled by the special expenditures governments propose for the purpose, since necessary industrial readjustment and contraction will involve fresh unemployment, and in any case governments will not be able to continue these policies because they will not have the financial resources with which to do so.

This situation, in Mr. Mayers's judgment, should be met by the expenditure of present public relief funds and private capital upon productive enterprises which will find an outlet for the employment of the surplus labor which is bound to emerge from the process of industrial transformation and reorganization. As one enterprise he recommends expenditures on the development of small country homesteads in convenient localities, and the construction of adequate roads leading to them. He meets the objection that farming is not sufficiently profitable at this time to attract people, that the cost of farm labor and other agencies of production are prohibitive, with the contention that the object of developing these areas would be to enable people to provide sustenance for themselves, not to make financial profit, in the same sense in which pioneers in other eras of economic readjustment had to farm and thus help themselves because there was no aid available from governments or relief funds.

While we agree with Mr. Mayers that prosperous economic conditions can not be restored by some magic formula or eloquent periods of after-dinner orations, we do not believe the world is passing through a season altogether without parallel in its records. Naturally, economic depressions differ from one another in their origin and character, just as the elevations which precede them differ in their origin and nature, but the human factor around which they revolve is fundamentally the same. All human life is a story of ups and downs. The surface of the earth itself is largely a picture of heights and depressions. The ocean tide ebbs and flows. Mankind never will pursue an even tenor in its thought processes, emotions and activities. It must have adversity or it never can make sound progress, from adversity it learns how to live. When it hurts itself it discovers how to heal itself, but the process of healing sometimes is painful and prolonged; sometimes it is dramatically instructive and disciplinary.

The world—which means, of course, the human part of it—will work itself out of its troubles simply because it will have to do it. But the process is going to be painful in many respects, whether it be prolonged or not. As an agency in that recovery society will have to get back to a simpler, more normal life; it will have to become reacquainted with nature; it will have to correct governmental waste, extravagance and incapacity; it will have to relinquish false gods of sheer materialism, artificiality and sensualism, and get itself a new set of standards; it will have to realize that true progress is not represented by large sky-scraping cities and the number of its enormously rich, but by the condition of its plain people, and particularly by the condition of those who do not live in the cities, who are engaged in the primary industries, which, in the last analysis, form the economic, and probably the social, backbone of a country. It will do all of these things.

Beyond doubt a reaction from the existing economic situation will be a progressive back-to-the-land movement, because this will be one of the indispensable factors in the world's industrial rehabilitation; it will be a reaction arising from sheer necessity. There will be other equally desirable reactions, and both governments and private interests should prepare for them at this time as far as they possibly can. There is sound merit in the recommendation of Mr. Mayers that we should prepare for these developments in the expenditure of funds now available for unemployment relief. Admittedly, it would take time to prepare and carry out a constructive permanent policy in that direction, but we believe a considerable section of the country would welcome such a step and before long, if not now, would be glad to participate in it.

LINDBERGH STILL ACCLAIMED

THE FLIGHT OF THE LINDBERGH IS far from being the most spectacular flight of the summer. The Atlantic has been spanned several times, a new round-the-world record has been set and the old non-stop mark has gone by the boards. Nevertheless, the Lindberghs are getting a great deal of headline space.

Most of this, no doubt, is due to the magic of Lindbergh's name. The glamour of the young man's marvelous flight to Paris is still with him. It will stay with him, probably, until he dies.

But at least a part of what may be laid to the fact that the Lindberghs are doing what all the rest of us would like to do. They are making a vacation tour by air, taking their time, going where they like, and doing it all for fun. We like to think that that foretells what we ourselves will be able to do some day, when aviation is a little better developed—so we read every line we can get about their flight.

POOR GENERALSHIP

SINCE THEY ARE PUBLISHED IN THE constituency most concerned, it is interesting to note what The Hamilton Herald, Independent, and The Hamilton Spectator, Independent-Conservative, have to say about Mr. Humphrey Mitchell, the Labor candidate who captured East Hamilton for his party last week, after more than thirty years of Conservative representation in the House of Commons.

Says The Hamilton Herald:

Even Hon. Robert J. Manion came to Hamilton and acting under the same bad advice, continued the notion that Mr. Mitchell was a "Red." Dr. Manion knows better now. To come to Hamilton and tell the citizens that one of their most respected citizens, an alderman of some standing, and a Labor man held in high esteem by all his fellowmen, was a "Red," was merely to insult the intelligence of the city, and consequently to lose votes.

The Hamilton Spectator is none the less complimentary to Mr. Mitchell. It says:

Mr. Humphrey Mitchell, the successful Labor candidate, representing the forces of opposition, found circumstances favorable for his election. To say this is not to detract from his personal qualities or to deny him the commendation which is his due. He fought a clean campaign, and was at pains to repudiate any suggestion of radical tendencies. He promises to uphold the highest constitutional standards, and to work, not only for the best interests of the constituency he represents, but of the Empire at large. His successful career in local administrative circles gives promise of useful service in the wider political sphere which he has attained. The Spectator wishes him well at Ottawa and predicts his continued success.

And in its reference to Dr. Manion's attempt to brand Mr. Mitchell as a "Red," The Toronto Globe says: "The evidence accumulates that personal attacks are not now as 'good politics' as of old; that it is even more evident that the people are increasingly inclined to rebuke politicians who make reckless misstatements with the intention of damaging their opponents."

It would be interesting to learn what Mr. Bennett thought of Dr. Manion's political generalship in East Hamilton.

LIMITLESS HORIZONS

THE OTHER DAY DEAN THOMAS W. Graham of the Oberlin Graduate School of Theology spoke before a group of summer school graduates; and few of his sentences stick in the memory and set one thinking, as all such speeches are supposed to do.

"There are finer tools yet to be made than any we have now," he asserts. "More stirring music will be composed, poetry of greater rhythm and profounder prose will be written, and in the realm of architecture, sculpture and painting, greater heights are yet to be obtained."

Why should a simple statement of fact like that be so encouraging? Why should it set one dreaming, and make one wish that one were just graduating from high school, with a world of limitless possibilities ahead? It does those things somehow; but why?

Probably it is because we like to be reminded that we live in a sadly unfinished world. We like to feel that great demands are going to be made on us. We like to be told that the human race as a whole is climbing painfully up a long, dark slope, and that men better than the ordinary stand out, here and there, to point the way and see glorious things beyond the rise ahead.

It is not altogether true that man always seeks his own ease and tries above all to make himself comfortable. There are men who cannot be happy unless they are tackling jobs that will take all they have to give, and more; indeed, all of us have a tinge of that illogical desire to spend ourselves completely on some job that can never be perfectly accomplished.

We shall, in time, produce new Shakespeares and Beethovens and Michaelangelos, and the world will be a better place than it is now. The hardest tasks are still ahead of us.

WHAT OTHER PAPERS SAY

BEAUBARNOIS
The Montreal Star

One thing the Dominion Government can do is to take over the canal.

Call this "government ownership" or by whatever hard names you please, the federal government should exercise to the full its whole powers to rescue this vast public enterprise from unworthy hands—hands which have been officially reported as "improperly taking from the company" funds which were "misused"—and to put it on a sound basis where it will be conducted for the Welland Canal.

PRAISE FOR BRITISH PREMIER
The Detroit News

Beyond all his contemporaries among world premiers and statesmen, Ramsay MacDonald has given an impression of moral as well as political greatness—of being a consistent and conscientious battler for great causes and noble ideals. Above all, he has given an impression of being anxious to build something better out of the wreckage of war, not only for his own country, but for the people of the whole world. And he never forgets that the kingdom of peace which he seeks can not be taken by chicanery or violence.

THE TOURIST TRADE
The Cleveland Plain Dealer

From an economic point of view the 1930 tourist industry saved the day for Canada. It was the big "invisible item" which created a favorable trade balance at a time when old King Wheat was not smiling. Canada is hopeful that it will repeat this year. The start is said to be promising. Canada figures that many Americans who would normally go abroad by crossing the Atlantic will do it this year by crossing the lakes. The attractions are many and the cost is much less.

THE EMPIRE AND THE LEAGUE
The Winnipeg Tribune

The London Daily Express, one of the enfant terribles of staid British journalism, is now gunning for the League of Nations. It asserts that Great Britain must withdraw from the League. It then makes the political error of giving its reasons.

One of the foremost of these reasons is that "the League of Nations was America's idea. To please America we agreed to it." A statement which is both untruthful and inaccurate. The draft, which in 1919 formed the basis of the League covenant, was written in the British Foreign Office in 1917. Premier Asquith had foreshadowed a League of Nations in 1914. President Wilson merely included it in his Fourteen Points in 1918.

A THOUGHT

I know that my redeemer liveth—Job xix. 5. We are made partakers of the redemption purchased by Christ, by the effectual application of it to us by His Holy Spirit.—Westminster Catechism.

Loose Ends

We prepare to abandon the public mind—and go forth into the wilderness—accompanied by four cans of beans—some worms—and not much else.

T. H. W. W.

a week. It hardly seems enough, so we go at it again.

BURN
KIRK'S
COAL
DOES LAST LONGER

The further we go the more difficult it becomes. For besides food we must have other things. We must have a dozen candles, says Percy, who was trained in the Great War, and a dozen candles (we have weighed them) weigh as much as two dozen eggs or a good-sized steak, and you can't eat candles. There is also bedding. We had almost forgotten bedding, but you must have bedding in the woods, don't you think? It makes the nights as much more comfortable. And even though there is nothing so far to put in them but four cans of beans, we must have plates and a few pots and pans. The worms, too, will weigh quite a lot when you consider the earth that goes with them. You must have a tooth brush and an extra pair of socks as well. Altogether it is alarming when you come to figure it all up.

** * *

INTIMATED already, I am going on a holiday to refresh myself after a year's constant contact with what we laughingly call the public mind, that which there is nothing more exhausting both for the public and for me. Now going away on a holiday probably doesn't mean much with you. It just means packing a grip, jumping into a car or train and going. But with primitive, rough life like me it is a much more difficult and complicated matter. I am going into the wilds, and when you go into the wilds you must go well prepared. In the wilds you are on your own. The public mind is no help to you there (and precious little here, for that matter). And how to prepare for such an adventure, what to take and how much, is a problem indeed.

** * *

FORTUNATELY FOR me George Fudbury has gone into the wilds ahead of me, on an expedition of his own, and his experience will be useful. Also, I imagine, it will be disastrous. Yes, Mr. Fudbury, who came from England after the war to settle on a farm out our way and who has never been out into the wilds of Canada before, has gone camping. He has taken his two young sons with him and such an assortment of camp equipment as has never been taken into the woods of British Columbia before. He has taken a tent which would accommodate half a regiment of soldiers. He has filled the back of his ancient car with groceries and canned goods of every description. He has taken an axe, a hammer and a saw (for purposes unknown but, as he says, just in case anything should happen). He has taken two large old hens roasted by Mrs. Fudbury, and lastly, which I consider a tremendous and gorgeous idea, Mr. Fudbury has lashed a small coop to his running board and he has taken two live hens so that they may be killed when convenient and his meat supply will remain fresh. Also, as Mr. Fudbury points out, it is quite possible that they will lay a few eggs on the way and, if they do not fall upon the road, they will increase the contents of the larder. And so with his sons shouting, his car rattling, his tent streaming in the wind and his two hens screeching in alarm, Mr. Fudbury has gone forth on his great pilgrimage to see what the wilds of Canada are like. There is nothing to suppose, that can be done about it.

** * *

SOMEHOW, THOUGH, I don't think I shall follow Mr. Fudbury's methods exactly. Percy, the stout journalist from Vancouver, who is going with me, says he could endure the axe and hammer and saw, but he draws the line at chickens on the running-board; for, as he points out rather emphatically, it is his running-board, the running-board of a new car, and he does not propose to make it a poultry road. Regrettably, therefore, we have abandoned the idea of the chickens. We shall have no livestock except our own and we are reserving them for the exclusive use of the fish. That is only common fairness to the fish.

** * *

IF YOU THINK it is a simple matter to choose the food for an expedition into the wilds, you should hear the discussions that go on between my comrade and me. We debate for hours whether we shall take four cans of beans or two cans of beans and two cans of peas. (The beans are favored at the moment.) We have purchased a sample can of beans to see how much it weighs, for my friend, Percy, claims to be able to make an elegant clam chowder; but no sooner had we grudgingly decided that we could afford the weight of two cans of beans than we recollected, with a start, that you can't make clam chowder without milk, no matter how able a cook you may be. As we have already learned by weeks of painful practice to avoid drinking milk with our tea, so we decide to have up the clam chowder idea altogether. It seems a blow, but it may turn out to be a disguised blessing. On second thought, after remembering the way Percy cooks chump chops until they are charred black, I am quite reconciled to the loss of the clam chowder.

On second thought, after remembering the way Percy cooks chump chops until they are charred black, I am quite reconciled to the loss of the clam chowder.

** * *

THE POULTRY and the chowder I having been vetoed, we have only decided so far on four cans of beans. We have debated at length the merits of canned peaches, canned pears and canned grapefruit, but we have decided them as too heavy for the nourishment contained. They are a luxury which we can't afford to carry, and they seem civilized and effeminate somehow. That brings us back to four cans of beans. We have also considered eggs, but eggs, we decide, will never survive our pack, and broken eggs in a pack are inconvenient. Broccoli, too, is sure to get stale, and it is dropped.

** * *

A LEARNED ARGUMENT has centred around the advisability of taking flour. I am in favor of taking flour because I assure Percy I shall put lots of baking powder in the next bannock and it will not stick half-way down. Percy is sceptical. He says he wants to walk back from his trip, since no one is likely to carry him, so we have abandoned the idea of flour. Pancakes, too, go by the board. This leaves four cans of beans to maintain two fairly large men for

he said, "I read those \$57,000,000 letters of yours—we want to see them read, and when they tell us what we want to know, say us these penance courts be handled?"

Well, we talked the following over and my friend made me promise to present it to The Times and, as my friend left, he frowned, saying: "Man, if I don't bring that to you, I would be blamed for the rot courts."

The Penance Tribunal, which operates to-day under the approximate cost of \$62,000 per year, has tried, to date, about 105 cases in British Columbia. These cases are only tried regarding the question of disability related to war service, as the present court does not allow the court to state the amount of pension to be paid. The widows, of course, receive \$60 per month, if their case is granted and carried through the other courts at Ottawa. The widow part of the pension is the only standardization of the whole act, out of the salaries paid judges, etc.

And of the 105 cases tried the tribunal has granted about eighty applications, but when these eighty cases arrived at Ottawa they were immediately placed in the Appeal Court, which continues under the present cost of \$60,000 per year. And the Appeal Court has thrown out seven-eights of these cases that were tried before the tribunal.

Now the absurdity of this procedure rests in the fact that the Appeal Court is merely trying a conglomeration of cases on paper, wherein lies the fate of a man or woman that it cannot see or fully understand. Its ruling is said to be final since it has the power to overrule everything in pensions and to reopen the cases of these men they turn down at any time that they need material to keep them in their jobs, etc.

It is the same thing as having a man jailed for murder in Quebec and having his trial away out here in Victoria without him. What judge in the country would think of letting such procedure take place in his court outside of the president of the Penance Tribunal?

The above gives a brief summary of how \$100,000 is plucked from the \$57,000,000 so-called pension allowance as handled by the present-day pension administrators under the thumb of Bennett. It is becoming a known fact that the present government in Ottawa positively declines to live up to the pension act, which has been made law by the Parliament of our country.

People of this country do not elect to power to have them squash the laws of the land. No, they elect people to properly administer the laws of the land. A government failing to do this is a poor government, and the electors of East Hamilton who tossed windy Mr. Tory out of office within a year evidently know it.

JACK SANGSTER.

BILLBOARDS

To the Editor—Billboard advertising has reached such enormous proportions in and around Victoria that it is spoiling the beauty of virtually every beauty spot in and around Victoria.

I would suggest that every citizen interested in this situation read the following article "Beauty or Billboards?" appearing in the September issue of The Woman's Home Companion.

This article expresses what I mean to the fullest extent. It is a very difficult and delicate matter to deal with, but it can be done, and citizens and tourists will greatly benefit by the results.

A VAN ALPHEN.

EYE OF SCIENCE PIERCES EARTH'S CRUST FOR RICHES

Geophysicists Find Deposits
Thousands of Feet Under
ground

Schenectady, Aug. 19.—Wanted—a mechanical nose.

Science has devised vacuum tubes to extend the human sense of hearing and seeing, but there is not an electrical means of detecting odors.

Science has developed a vacuum tube that will measure the light of a star-hundreds of light years away, but there is not any means of detecting the presence of gases so powerful that they will knock out a man in a few seconds.

According to William C. White, engineer of the vacuum tube engineering department of the General Electric Company, the scientist in the past few years has greatly promoted human welfare by extending the sensory activities previously performed in response to the stimuli of light, sound, touch and temperature. Vacuum tubes, notably the light, sensitive photo-electric tube, are now applied to routine tasks, which are performed by the unthinking. The photo-electric tube is used to inspect the labels on small packages which are produced rapidly and in great numbers. Formerly those packages passed before an operator who rejected all packages which came through improperly labelled or without any labels. The work was irksome and occasionally failed. The photo-electric tube never fails. It performs the work better and more cheaply.

Vacuum tubes are used to translate sound waves into electrical waves for transmission via wire or air. In telephony, in radio, in television, they are again used to interpret the electrical waves and retranslate into sound waves. The photo-electric tube responds to stimuli more rapidly than the human eye. The radio tubes, used in transmission and reception, permit the human voice to reach distant continents.

But who will devise a vacuum tube to extend the sense of smell. Smelling involves a very delicate chemical operation. The nose will detect minute traces of chemical substances that would otherwise be undetected. Man can produce almost any desired odor chemically, but he cannot detect an odor chemically, mechanically or electrically.

British builders have delivered to the Japanese navy a flying boat designed to carry 200 persons. It is supposed to be the largest boat in the world.

AN EMBARRASSINGLY CLEAR SKIN AT 72

Fortunes in skin foods? Yes—yet nature's way of feeding the skin is via the blood, the only source of absorption into any body cell, then only if the substance has been digested. If the blood be kept normally alkaline (non-acid) by eating alkaline foods, a clear skin is assured, pink and pimple-free as a babe's. At seventy-three, my skin is clear enough to be considered a compliment, yet until I was past fifty I had an unusually bad skin—pinkly and putty colored. Alkaline Roman Meal, by alkalinizing my blood and keeping my bowels emptied after each meal, has worked this magic. Regardless of sex, a wonderful clear skin is a social and economic asset.

AN ARTIFICIAL EARTHQUAKE

The seismic method has already been used with striking success in the United States to locate oil fields. It consists of causing an artificial earthquake. A charge of high-explosive is blown off in the ground, and then the progress of the shock is measured by extremely delicate seismographs. The pace at which the shocks travel depends on the nature of the rock through which they will have

traveled. They will go through granite at 20,000 feet per second, but, in sand oil, they travel at a tenth of that rate.

In Texas these methods have found oil down to 7,500 feet. Oil itself cannot be directly located so the practice is to find the "salt domes"—salt deposits of crystallized salts of uncertain origin, near which oil pools are often found.

GEOPHYSICS IN A.D. 136

The seismic method is at once the oldest and the most modern. It is only since the war that it has been used for finding minerals. Much of the essential preliminary research was done on the vibrations of the big guns during the war, and seismic methods were actually used to locate gun-positions. But a seismograph for tracing earthquakes was invented in 1880 by a Frenchman, Dr. Chauvin. It consisted of three dragons holding brass balls in their mouths. When there was a shock, the balls fell into the open mouths of three frogs squatting beneath.

Electrical methods—there are many—depend on the fact that some metallic ores are better conductors than the surrounding rocks. Electrical currents are passed into the earth and the paths that they follow underground are charted. This method can be used to find water. Electrical surveys in Tasmania located copper-nickel ores under swamp country where no ordinary prospector could have found minerals.

HOW GOLD IS FOUND

The magnetic method is the oldest and, can only be used for magnetic ores, which will deflect a needle just as a piece of iron will agitates a compass. This method was used recently to find gold on a New South Wales field where production had been steadily going down. The survey found the best spots for boring through the thick lava on top of the field, which prevented profitable working. Gold is distributed in the soil in such small quantities that it can never be found directly, but sometimes it can be tracked by locating another mineral with which it is often associated.

The main object of the Geophysicists' Expedition was to test the various methods and then make them available to the world at large. Instruments which have hitherto been closely guarded secrets are described in the Report. Already mineral production exceeds \$175,000,000 a year. We can only guess at how much more hidden treasure lies beneath the Empire's quarter of the earth's surface, awaiting discovery by new methods of prospecting.

HARRY LAUDER WEEPS

Editor's Special 'In The Victoria Times' London.—Among many good stories told by A. C. Astor, the ventriloquist, in his enterprising book, just published, "Concerning . . . The Stage" is one which places Sir Harry Lauder in an interesting and pathetic light. The great comedian was a guest in Mr. Astor's home:

"Just as we prepared to 'turn in,' he asked to go into the nursery and 'he's a look at the bairns.' We tipped gingerly in, and found my little boy fast asleep in that attitude of carelessness common to bairns. Sir Harry stood for nearly a minute looking at him, while two tears trickled down his cheeks, and as we came out again, he said to me, 'Arthur, man, and I could have got to-day if only I could have what you have got in that room.'"

(Advt.)

Why should you let housework spoil your hands?

YOU ask any beauty editor. Y. Look in the magazine and newspaper articles. You'll find "Vaseline" Petroleum Jelly recommended to keep the hands soft. Follow the advice of those people who know. Apply "Vaseline" Jelly to your hands at night and wear old cotton or silk gloves. When you manicure your nails, wrap a little cotton around a dull orange stick, dip it in the Jelly and work back the cuticle. These two easy things will make a world of difference in the looks of your hands. We all have to wash dishes, and dust furniture, or pound typewriters or work in gardens. But our hands need not advertise the necessary toil to the world. Lay in a store of "Vaseline" Jelly and use it freely. Get a jar today just for your own personal use. Don't delay. Product of the Chesebrough Manufacturing Co., Cons'd., 5520 Chabot Ave., Montreal, Canada.

New Fall Styles in Women's Apparel

Finest Qualities at New Low Prices

Fall Millinery Fashions

Favor the Second Empire

The 1860 tilt . . . the favorite fashion of a famous charmer, the gay Empress Eugenie, translated into modern terms in these gay little hats to wear right now. Colors are black, the darker shades of brown, kiltie green, navy blue and rich garnet hues. Many are feather trimmed. Popularly priced at

\$2.95, \$3.95 and \$4.95

—Millinery, First Floor

Back-laced Corsets on Sale at \$1.39

Corsets of fancy-striped cotton with elastic top and long skirt. Back-laced and lightly boned. Sizes 24 to 29. Priced at . . .

—Corsets, First Floor

AN AUGUST BRIDE

W.B.A. Hear Reports—The regular meeting of the Women's Benefit Society was held on Monday evening in the K. of C. Hall. Mrs. Veitch presiding owing to the absence of the president, Mrs. Toad. Members were pleased to welcome Mrs. Mary Richmond, a well-known pioneer of Victoria, but now a resident of Los Angeles. Mrs. C. Lang succeeded Mrs. Charles as chairwoman and convenor of the sick committee. Reports from headquarters were received with much appreciation as they proved the surprising growth and splendid financial standing of the association. The Girls' Club will hold a special party at the home of Mrs. Trowdson on August 26. Friends and members are cordially invited. After completion of the business a social evening of cards and games was held, followed by refreshments. Prize winners were: Miss Hilda Head, Mrs. Taylor, Mrs. Clifford and for the contest, Miss McAllister.

Esquimalt Card Party.—Under the auspices of the Esquimalt Women's Institute a card party will be held tomorrow evening in the Parish Hall, when good prizes and refreshments will be provided.

Esquimalt Card Party.—Under the auspices of the Esquimalt Women's Institute a card party will be held tomorrow evening in the Parish Hall, when good prizes and refreshments will be provided.

AUTHORS HONOR DR. D. C. SCOTT

Local Writers Hold Reception at Home of Mrs. J. R. Angus

Dr. Duncan Campbell Scott of Ottawa and Mrs. Scott were guests of honor at a reception held yesterday evening at the home of Mrs. R. J. Angus, secretary of the Victoria and Islands Branch Canadian Authors' Association, of which association Dr. Scott has lately been elected national President. Mrs. Angus was assisted in receiving the guests by Mrs. Ebba Canavan, local chairman, who welcomed Dr. Scott on behalf of the local branch and presented Mrs. Scott with a corsage bouquet.

Dr. Scott in replying expressed his interest in the work of the branch and congratulated the members upon their activities, which were very commendable and surpassing the material shown in some other parts of Canada. The development of focal color, artistically dealt with, he believed to be of the greatest advantage in the formation of a national literature. The Association, the formation of which he is national president, has become automatically one of the directors, he praised in the highest terms as a foundation for the future; and this with the Royal Society, Authors' Association, and other similar bodies were great powers working slowly but surely for the ultimate good of the country. He expressed his satisfaction that Dr. Charles G. D. Roberts is receiving recognition for the work he has done in literature and which reflects glory upon his native land.

During the evening members of the local branch read selections from their writings. Those contributing poems and extracts from prose were Miss Eugenie Perry, Mr. Donald J. Francis, Mrs. C. D. Henderson, Mr. Lewis Wharton, Marion Isabel Angus, and Mrs. Ebba Canavan and Dr. Scott, who read three of his poems, "Fantasy," "Permanence," which was published in the London Mercury, and "The Miner." Mrs. Scott is also a writer. A volume of her charming verse has been published recently under the title of "Rose Shadow." Dr. Scott's poems were received with enthusiastic applause.

A group of songs was sung with artistic effect by Mrs. Lewis Wharton, accompanied by Mrs. Leo Hayes of Kelowna, and an encore accompanied by Mrs. J. L. Cameron. Madame Eva Baird was also here, with great appreciation in several numbers. Dr. Duncan Campbell Scott accompanied her. Dr. Scott spoke in this connection of the work of the Theatre Guild of Ottawa of which he is also president, and of the interest the recently appointed Governor-General, Lord Bessborough, is taking in theatrical and musical productions.

Mrs. Ebba Canavan and Mrs. J. O. Cameron presided at the reception which was centred with a low blue bowl of peach and yellow dahlias and pink gladioli and other summer flowers were artistically arranged about the reception room. Out of town guests were Mrs. J. L. Dunn of Port Alberni and her son, Mr. Eric Dunn; Mrs. Leo Hayes of Kelowna, and Mr. Harry Blok, a visiting writer from Holland, who recited an original poem written some years ago in Dutch and later translated into English.

Dr. Scott received presentation copies of collected verses of Marion Isabel Angus, "Caravan of Freedom," of Lewis Wharton's "Songs of Carthage," and of M. Eugene Perry's short stories, "The Girl in the Silk Dress."

Court Triumph, A.O.F.—The ladies of Court triumph will meet Friday evening at 8 o'clock. Instant business will include initiation of candidates. At the close of the business session a novelty feature has been arranged and ice cream will be served.

Daughters of St. George—Daughters of St. George, Princess Patricia No. 238, will hold their regular meeting on Friday at Hatt's Hall at 8 o'clock. Members are requested to attend as a trip to Nanaimo is to be arranged for Saturday, August 22.

MARRIED AT PARENTS' HOME

EUROPE GREETS BUSINESS CLUBS

U.S. Women's "Good Will" Tour Honored By Royalty; Much Feted

Members of the good-will tour sponsored by the American Federation of Business and Professional Women's Clubs, headed by Miss Lena Madeline Phillips, who are touring twenty European countries, are receiving an enthusiastic welcome.

In Rumania, the Balkan section of this fourth good-will tour, was given a royal welcome by King Carol. Special railway cars were provided, and a government representative assigned to secure for the visitors every comfort and ease in transportation and sightseeing.

The mayors of the cities of Giurgiu, Bucharest and Constantza entertained the group and Princess Alexandra Constantza fed them at her ancestral castle.

ROUMANIAN FEDERATION

In Rumania an impressive ceremony took place when the delegates visited the tomb of the Unknown Soldier and laid a wreath upon it. Also in Rumania Miss Lena Madeline Phillips, president of the International Federation of Business and Professional Women, and leader of the group, was presented with in 1932 a Rumanian Federation of Business and Professional Women would be formed.

Count Anton Apponyi spoke at a luncheon given the tourists in Budapest, and Countess Bethlen, the prime Minister's wife, also was present at this function. Here, too, Miss Phillips presided at an interesting ceremony, the opening of the new club rooms of the Hungarian Federation. After the opening, the delegates attended a dinner given at the Parliament Building where they were met by the Minister of Foreign Affairs, the American Consul and the Secretary of the British Embassy.

In Amsterdam a dinner was given them, in which Mrs. Charles Hoover, wife of the American Consul, presided. In Munich Dr. Florentine Rickmers, Minister of Labor, presided at a luncheon, and in Florence a dinner was given the group, at which the speaker was Professor Campani.

In Amsterdam a dinner was given them, in which Mrs. Charles Hoover, wife of the American Consul, presided. In Munich Dr. Florentine Rickmers, Minister of Labor, presided at a luncheon, and in Florence a dinner was given the group, at which the speaker was Professor Campani.

One of the most important and interesting affairs arranged for the delegates was a band concert given by the Italian Federation of Business and Professional Women, in their honor, and presided over by Countess Maria D. Ancora.

To many of the delegates one of the high lights of the tour was the audience given them by His Holiness Pope Pius XI.

Miss Hazel Mervin, with whom will be associated Miss Mayne Mawer, will be hostess at the summer camp of the parents at "Brookside Den," Cowichan Bay, include: Mr. and Mrs. D. **Arnold Bennett
Laid to Rest In
Mother's Grave**

Canadian Press

London, Aug. 19.—The only mourners present when the ashes of Arnold Bennett, author and journalist, were buried at Burslem recently were his widow, Frank Bennett, his brother, and Mrs. Frank Beardmore, his eldest sister.

Burslem is one of the "Five Towns" of Arnold Bennett's novel. Precious has been taken to secure greatest privacy and the officiating clergyman, Rev. A. L. Lumb, rector of Burslem, did not know whose ashes were to be interred until he arrived at the cemetery. The ashes were buried in the grave where Mr. Bennett's mother and grandparents lie. This, it is understood, was in accordance with the unanimous decision of his near relatives, and with Mr. Bennett's own desire.

"How can I stop my child from
using words I never asked?" Mrs. Gruenberg pointed out.

"Now parents ask: 'What is interesting and challenging enough to my child so that—'?"

"The newer attitude of parents augurs well for the growth-up of tomorrow. By nature every child is active. His environment challenges him continually. He learns to control his environment to handle and understand things."

"We waste time and energy by not utilizing a child's interest in a constructive way. Toys fulfill this function."

"Give the small child large playthings which will interest him in the furniture. The difficulty of the old method of child training was that a child used to be stopped constantly by prohibitions every time he wanted to concentrate on something interesting. In adolescence, his powers of concentration often were impaired."

**GERMAN WOMAN FPLIER
ON SECOND STAGE OF TRIP**

Associated Press

Moscow, Aug. 19.—Pauline Margarete Etziorf, German flier, left Fiume, in the Tatar republic this morning on the second stage of her air journey from Berlin to Tokyo.

Mrs. Aubrey S. Smith, P. O. Box 104, North Sydney, Nova Scotia is only one of thousands of women who depend on Vegetable Compound to carry them over difficult times. Won't you try it, too?

*"I Suffered
such Pain"*

"MOTHER advised me to take
the Vegetable Compound
because I suffered such pain each
month."

"It helped me so much that after
I married I still took it. I am ex-
pecting a little one in July and I
depend upon Vegetable Compound.
My sister takes it too."

**Local Couple Are
Wed In Seattle;
Will Live Here**

An interesting wedding took place in Seattle recently between Sheila Marie, only daughter of Mr. M. E. O'Neill and the late Dr. O'Neill, and Harold Vernon, second son of Mr. and Mrs. W. P. Bassett of 1916 Shakespeare Street. The wedding took place quietly at noon on Monday, in the presence of immediate relatives; the ceremony being performed in St. Clement's Episcopal Church by the Rev. E. C. Pritchard.

The bride was given in marriage by Dr. Stanley Miles of Victoria, her attendants being Mrs. Alfred Food as matron-of-honor and Miss C. D. King of Victoria. Mr. and Mrs. Food supported the groom. The bride looked lovely in her dress of silk flat crepe in oyster shade with hat to match and carried a bouquet of roses and lily of the valley. The matron of honor wore a silk lace dress in pale lavender shade with hat en suite and corsage bouquet of roses and mauve peacock feathers.

The young couple are native daughter and son, the bride being a former nurse at St. Joseph's Hospital and the groom being a member of the Merchant Class who was known locally in mercantile circles. After a trip motororing in the states and in Vancouver Mr. and Mrs. Bassett will reside at 1481 Richardson Street.

**ELIMINATE THE
"NO-NO" PLAN OF
CHILD TRAINING**

"Mothers should concern themselves with what the child can do, rather than with what he cannot do," is the advice of Mrs. Sidonie Matthes Gruenberg, director of the Child Study Association.

"How can I stop my child from
using words I never asked?" Mrs. Gruenberg pointed out.

"Now parents ask: 'What is interesting and challenging enough to my child so that—'?"

"The newer attitude of parents augurs well for the growth-up of tomorrow. By nature every child is active. His environment challenges him continually. He learns to control his environment to handle and understand things."

"We waste time and energy by not utilizing a child's interest in a constructive way. Toys fulfill this function."

"Give the small child large playthings which will interest him in the furniture. The difficulty of the old method of child training was that a child used to be stopped constantly by prohibitions every time he wanted to concentrate on something interesting. In adolescence, his powers of concentration often were impaired."

**Holiday-maker
Flew From New
York To Jasper**

Jasper Park, Alta., Aug. 19.—Having completed the long airplane journey from New York City in nine hours flying time, Dr. Robert E. Bickell, prominent New York physician, arrived at Jasper Park Lodge yesterday evening to join his wife and daughter who have been guests at the rustic hotel for the past two months. W. G. Lind, Edmonton, who piloted Dr. Bickell on the last leg of his long flight, guided the Western Canadian Airways plane to a splendid landing on the sixth fairway on the golf course which adjoins the lodge, marking the second time this season an airplane has landed on the course.

Dr. Bickell, prominent Hollywood movie producer, landed here early in the season after a record daylight flight from Los Angeles.

**W.A. Garden Party
To Honor Bishop Of
London Thursday**

The public is invited to attend the garden party which the Bishop of Columbia and Mrs. Schofield and the president and members of Columbia W.A. will hold at Bishop's Close tomorrow afternoon from 3 till 5.30 o'clock in honor of Rt. Rev. A. F. Waddington, Bishop of London. A collection will be taken at the gate in aid of the Cathedral window fund. The Bishop will arrive from Vancouver tomorrow.

A baby's violent reaction to any addition to the diet usually indicates too much of the new food was offered the first time. I said such violent reactions are usually due to too large doses at first. There are other factors to consider. The baby who is suffering from the heat, who is temporarily

EX-VICEROY OF INDIA AND BRIDE

The Marquis of Reading, formerly Viceroy of India, and his bride, Miss Stella Charnaud, who had been his private secretary for many years, are shown in London. Their marriage took place quietly in Prince's Registry Office, London, on August 6.

**YOUR BABY and MINE
to MARY MEYER SINGER**

Mrs. Eldred will be glad to answer any questions pertaining to babies and children. A stamped and self-addressed envelope forwarded to this office will bring a personal reply.

**THOSE FIRST CEREAL FEEDINGS
SHOULD BE SMALL**

Many mothers say convincingly "Oh, cereal doesn't agree with my baby!" Probably these mothers believe that. In a very, very small percentage of cases, cereal might possibly disagree with the child. It is likely that most of these mothers should have expressed themselves this way, "The way I gave cereal to the baby, it did not agree with him."

The great difficulty is to prevent a mother from starting a child on a new food in the amounts she deems desirable in the diet lists. No matter how bland cereal is needed in the diet, the baby's first tastes of it should be small, even tiny in amount.

Here is a stomach attuned to a sweet, bland, liquid food, provided for by nature. To feed the baby cereal, or orange juice, or vegetables is to offer upon him a food which is entirely different in flavor or texture, which in large amounts might be actually distressing to him.

**INTRODUCE NEW FOODS
CAUTIOUSLY**

Each new food must be introduced into the diet cautiously. Give just a teaspoonful the first day, another teaspoonful the next day, and so on for a week if necessary, until the mother is certain that this particular food is going to cause no digestive strain.

The eighth day is early enough to double the amount. Some days later it can be doubled again so that eventually by slow increases the amount can be increased to the diet. The amount stated in the diet list is the quantity from which a baby of a given age and weight will be able to derive the nourishment expected of this food.

A baby's violent reaction to any addition to the diet usually indicates too much of the new food was offered the first time. I said such violent reactions are usually due to too large doses at first. There are other factors to consider. The baby who is suffering from the heat, who is temporarily

AUNT HET

BY ROBERT QUILLIN

Dear Child!

No mother can expect that her child will escape *all* the ills to which children are subject, but she can do much to relieve their severity.

If your child is constipated—if he has a cold, a fever, no appetite or a coated tongue, don't wait until a more serious illness results. Get Baby's Own Tablets at once.

For your own peace of mind don't be without Baby's Own Tablets. 25 cents a package at any druggist's.

Elks Return to Early Season Form in Winning Ball Title
With Reinforced Line-up Club Should Do Well in B.C. Series

Veteran Walter Lorimer Led Local Elks' Team to Title in 1923

Stella Walsh Appears in Court for Hitting Spectator With Discus

After setting a great pace all season the Elks on Monday evening earned the right to represent Victoria in the British Columbia baseball series by turning back the Eagles in the final play-offs. The antlered tribe started like a house afire at the beginning of the year but towards the end of the season their fire began to sputter. However, on Monday evening the Elks returned to their old form and smothered the Eagles under a twelve-run barrage. It is to be hoped the new champions will continue to show at their best in the provincial series, which will get under way here Saturday against the Vancouver Terminal League titleholders.

The Elks will have the privilege of taking on players from the other three local clubs to strengthen their lineup for the B.C. series. This will be a big help to the champions, as they are badly in need of at least one more pitcher and an infielder. With the first night game in Vancouver, however, no doubt they will give a good account of themselves under the floodlights. If their eyesight proves as good as their animal namesake they shouldn't have much trouble.

The Elks have a well-balanced club, and with the additional reinforcements should be able to hold their own with the mainland clubs.

The local teams will be at a handicap when they play their first night game in Vancouver, but no doubt they will give a good account of themselves under the floodlights.

If their eyesight proves as good as their animal namesake they shouldn't have much trouble.

An interesting sidelight on the forthcoming series centres around Walter Lorimer, grey-haired manager of the Elks. Lorimer has the honor of managing the only Victoria team to ever win a B.C. Senior "A" championship. And strangely enough it was the Elks that won it. Back in 1922 Lorimer piloted a club that included such well-known players as Haley Jackson, the late Harry Copas, Roy Copas, Deacon McIlvride, now in Detroit; Norman Forbes, Theo Townsend, Art Minnis, "Poke" Gravlin, Bill Turpel and Harry McIlvride, all of whom were in the provincial finals. And now, nine years later, Lorimer is again managing a B.C. team with an Elks team that includes three members of the former champions—Forbes, Minnis and Dunn. Good luck, Elks.

Stella Walsh, who is best known as the world's fastest girl sprinter, was charged with atrocious assault and battery when a discus she was throwing in a Jersey City meet hit a spectator on the head. The discus is a very difficult thing to control and responsible track authorities realized the long time ago that a discus thrower in the centre of the field out of reach of the spectators. The field is policed during the event to keep people out of harm's way. The people who should have been charged with the spectator's injury are the ones who were running the Jersey Track meet in such a way that spectators were endangered.

There is no danger in weight-throwing events as the fields are kept clear of people who have no business there and when the throwing ring is properly placed. But there have been many accidents caused by slack management. The most dangerous throwing implement, by far, is the javelin, which several have been broken here. When several are allowed within range, many people are slowed within range. The victim does not see the javelin coming point-on through the air. Wide clear space is needed for this event. Safety is the name of the game.

At Travers' Island track, where infield space is limited, the club built a chicken-wire fence around the weight-throwing rings to protect the crowd—a device that is frequently used on golf tees where they are bordered by a high fence. If a hammer breaks or a discus slips the weight goes off sharply to the right when thrown by a right-handed thrower. The wire fence takes care of that. But at the end of a long throw, there is no guarantee of safety except keeping the field clear—which is up to the athletic authorities.

Pigeon Racing

The Victoria and District Racing Pigeon Club had a race from Boston Bar over the week-end, 120 birds being liberated at 8 a.m. Results follow:

H.M.S.

J. Denon's William 34.820
R. Barrie's Beverley 35.056
R. H. Green's Ferbie 35.111
T. Dunlop's Walkathon 35.125
Dr. Kelley's Mate 35.125
James Stewart's Defiance 35.151
R. Margison 35.214
J. Bland's Maybe 35.226
R. Dickinson's Snowflake 35.243
G. Stewart's Snowy 35.245
N. Howes' Fair 35.254
W. R. Tait's Windy 35.444
S. Scott's Mac 4.02.13
J. Bowcott's Produce 4.07.03
James Stewart's won the pool, and Denon G. Powell and Sons' special.

The next race will be from Spence's Bridge.

Single and Double Propellers Will Be Determining Factor

Miss England II, Holder of World's Straightaway Record, Equipped With Single Wheel, Will Have Advantage on Stretch, While Slower Three Miss Americas With Twin Propellers Will Have Edge on Turns; Propeller on British Boat Took 350 Hours to Make; Don Says He will Make Another Try for Automobile Record

New York, Aug. 19.—Kaye Don, dapper, smiling Englishman, who rules one-third of the speed monarchy Great Britain has set up over land, water and air, arrived yesterday to challenge the United States for one of the last, and most impregnable of racing trophies.

He came to match his world record holding speed boat, Miss England II, against Gar Wood and his Miss America V, and try for the British international trophy at the Harmsworth Cup races on the Detroit River September 5, 7 and 8. The beautiful white craft that the late Sir Henry Seagrave drove to his death and a record of 98.76 on Lake Windermere, England, last year, and that Don forced to successive record speeds first of 103.49 at Buenos Aires last April and 110.223 on Lake Garda in Italy in July, will arrive in Montreal on Saturday.

And so with the fastest power boat that ever cut the water, a fit companion for Great Britain's record-holding Schlesinger's Golden Arrow, fastest racing car in the world, Don will attempt to lift the trophy Lord Northcliffe set up in 1906, which Gar Wood has held for years against four British and two French challenges. As Don sees it, the three thirty-mile dashes will turn into a duel between Miss England II, with her single propeller, Miss England against the slower double propellered Miss America, with their greater ease of handling on the turns.

TALES WITH EXPERTS

For hours Don chatted with experts about the construction of the Miss England II, which develops 2,000 horsepower as compared to about 1,000 for each of the three Gar Wood boats, and is powered with the same type of Rolls Royce engine that is used in a Schneider Cup plane. He talked freely of super-chargers, the propeller that took 350 hours' work to machine, and the remarkable 12,000 revolutions a minute it attains at top speed.

But as to his chances against the three Wood boats, where he can encounter engine trouble but once to be ruled out for failure to finish one race, while the defenders will have two boats break down and still win, Don merely would say with a smile.

"I sure we'll have some good racing."

Don's belief, and Gar Wood thinks

the same, that 150 miles an hour will be attained in speed boats with propellers of 100 pounds but to exceed this speed air propellers will be necessary.

He had Miss England II wide open when he hit 12 miles an hour on one stretch at Lake Garda.

Don intends to try for the automobile speed record again next year.

"I mustn't forget that," he said. "I shall have another go at it."

Two of the speeded players and half of the British invasion were eliminated yesterday.

Clifford Sutter, New Orleans, and Wilmer Allison, from the Davis Cup team, were the domestic stars who suffered upsets, and G. Patrick Hughes, England, accompanied them into the discard.

Allison had a commanding lead on Perry but fell to pieces. The scores were 4-6, 6-0, 3-6, 6-1, 6-2.

Sutter bowed out in the second set after a 6-0, 6-2, 6-3, 6-4 decision to J. Gilbert Hall, East Orange, N.J., who was eliminated by Bryan Grant, Atlanta, 6-3, 6-4, 7-5, in a third round.

Clifford Sutter, New Orleans, and Wilmer Allison, from the Davis Cup team, were the domestic stars who suffered upsets, and G. Patrick Hughes, England, accompanied them into the discard.

Allison had a commanding lead on Perry but fell to pieces. The scores were 4-6, 6-0, 3-6, 6-1, 6-2.

Sutter bowed out in the second set after a 6-0, 6-2, 6-3, 6-4 decision to J. Gilbert Hall, East Orange, N.J., who was eliminated by Bryan Grant, Atlanta, 6-3, 6-4, 7-5, in a third round.

Two of the speeded players and half of the British invasion were eliminated yesterday.

You Gehrig Aiming At Consecutive Games Record

First Baseman of New York Yanks Plays 1,000 Games

vous Home-run Hitter and Team-mate of Babe Ruth Shows No Signs of Weakening After Continuous Playing Record Started in June, 1925; Major League Record Is 1,307 Held by Everett Scott; Yanks Beaten 5 to 4 in Eleven Innings by Detroit; Chicago Cubs Beaten by Boston

Henry Louis Gehrig has played in 1,000 consecutive games for New York Yanks and has not given a sign of weakening. Only two players in the major leagues ever have beaten that. Everett Scott took part in 1,307 games for the Boston Red Sox and the Yankees from 1916 to 1925, and Joe Sewell, now a 40-year-old, played 1,103 for Cleveland. About the time Scott's record ending, Gehrig became New York's regular first baseman, began in June, 1925, won numerous honors as a star batter, Babe Ruth's leading home-run rival, and in 1927 as the most valuable player to his club.

Gehrig took part in his 1,000th game yesterday, his 11th of the current season, without adding anything to his batting laurels. He failed to get a hit in five attempts against Earl Whitehill and Tom Bridges, Detroit, and the Yanks won 5 to 4. After eleven innings, saw the team go down to 5 to 4 defeat before the home-place team of the American League. It was a nip-and-tuck contest in which a home run by Charley Ruffing, Yankee pitcher, put the New Yorkers ahead in the ninth, only to have the Tigers tie the count and win out two innings later when Bridges singled and Charley Gehring brought him in with a home run off Ruffing's successor, Vernon Gomez.

SENATORS BEATEN

Only one other American League team has played yesterday and in it St. Louis Browns turned on Washington Senators after three straight defeats and pulled out a 4 to 2 triumph. The Browns bunched their hits off Bump Headley for three runs in the third, a double by Red Kress bringing in the deciding counters.

The Boston Braves likewise made a come-back to win after the National League's two games. After dropping four straight to the Chicago Cubs, they staged a ninth inning rally behind the fine pitching of Fred Frankhouse and downed Chicago, 3 to 2. Frankhouse, pitching his first full game since a recent operation, held the Cubs to five hits. The deciding run came when Milwaukee doubled, reached third on an error and scored on Worthington's success, Vernon Gomez.

For Amateur League Ball Teams Clash at Royal Athletic To-night

NS PLAY FOR T. BRUNDSON P; JACK NOBLE AND LEO HOLDEN WILL PITCH

In the opening game of the new all-league series to determine the winner of the T. Brundson Cup, the Elks, newly crowned city amateur baseball champions, will take the Sons of Canada at the Royal Athletic Park this evening. The game will get under way at 5 o'clock, and in view of the rivalry between these clubs a good crowd is booked for the game.

Jack Noble and Leo Holden will be opposing hurlers, with the latter having a determined effort to turn the champion. Although being the last performance of the season, the game is a play-off series. Noble and in a good exhibition and will doubt prove troublesome to the Elks.

The other teams in both major leagues had an open date.

NATIONAL LEAGUE

Boston, Aug. 19.—Red Worthington's single in the ninth scored Maranville with the run that gave the Boston Braves a 3 to 2 decision over the Chicago Cubs yesterday.

R. H. E. Chicago 2 5 1 Boston 3 11 3 Batteries—Warneke and Hartnett; Frankhouse and Bohl.

Philadelphia, Aug. 19.—The Pittsburgh Pirates defeated the Phillies 16 to 5, yesterday in the final of the five-game series here. The Pirates made eighteen hits off three Philly pitchers. Klein hit two homers for the winners. It was the second meeting between Belanger and White. In their previous

game, Belanger had an open date.

AMERICAN LEAGUE

St. Louis, Aug. 19.—Dick Coffman pitched the St. Louis Browns to a 4 to 2 victory over the Washington Senators yesterday. It was Coffman's third straight win.

R. H. E. V. Washington 2 5 1 St. Louis 4 10 0 Batteries—Hadley, Fischer, Brown and Spencer; Coffman and Bengough.

Detroit, Aug. 19.—The Tigers won the New York Yankees 3 to 4. Bridges's double and Gehring's double in the eleventh brought the winning run. Ruffing hit a home run in the ninth for New York.

R. H. E. New York 4 9 0 Detroit 5 14 1 Batteries—Ruffing, Gomez and Dickey, Jorgens, Whitehill, Bridges and Grabsow.

COAST LEAGUE

At Portland—R. H. E. Los Angeles 1 3 2 Portland 4 6 1 Batteries—Hanson, Moss and Hannan, Campbell, Mallea and Woodhill.

At San Francisco—R. H. E. Sacramento 3 6 0 Missions 5 12 3 Batteries—Vinci, Collard and Wirth; Walsh and Riedl.

At Seattle—R. H. E. San Francisco 13 17 0 Seattle 2 8 0 Batteries—Gibson and Mealey; Hartwig and Cox.

At Los Angeles—R. H. E. Oakland 9 15 2 Hollywood 8 10 2 Batteries—Parron, Randolph and McMillen; McEvoy, Gould, Johns, Turner and Severeid.

INTERNATIONAL LEAGUE

Rochester 10, Baltimore 5. Toronto 14, Jersey City 4. Montreal 9, Newark 4. Reading 5, Buffalo 3.

TRUSTEES MAY EXPROPRIATE

Saanich School Sites Provide
Problems; Board Demands
Carey Road Deed

Trouble in securing title to two of the three Saanich high school sites again developed yesterday evening when the School Board were informed that only the Keating Cross Road property purchased from Mrs. Butler had been deeded.

J. W. Rowlands had refused to sign title deeds to Carey Road property until a clause was inserted to the effect that the board might dispose of a gift of 500 feet of land to C. F. Dawson was not disposed to complete transfer of the Cedar Hill Road site until provision had been made for a roadway along one boundary.

The board will insist that Mr. Rowlands fulfill his written offer as promised. Full completion of the deed by the end of the week, the board will denounce the present arrangement and expropriate the land required, possibly reverting to its first choice, the corner of Tillicum and Carey Roads.

Action on the Cedar Hill site was deferred pending examination of a map being prepared by Mr. Dawson.

D. G. Clark of Edmonton, Alberta, who was offered the position of agriculture teacher at the three high schools at a salary of \$1,825 annually.

Water Wizards Gave Saanich Flowing Well

Three Willow Twigs Bent
Over Well Site for Keating
School.

How three water wizards aided Saanich to equip Keating High School with water, and delivered the only flowing well in Keating district, was told the Saanich School Board yesterday evening by Trustee J. L. Brooks. A. Roelandt, Herbert Young and John Sarup were the willow twig experts and the Board passed a special vote of thanks to the trio.

"Congratulations all around on a flowing well" was Chairman F. V. Hobbs' greeting to his conferees when the session opened. Trustee W. S. Thorpe said: "We ought to feel very thankful," and Trustee W. Tomes admitted "my forecast was confirmed when I went out there and saw that dry hole. Our position would have been serious indeed if that costly school had proved to be in a waterless area."

SITE WENT DRY

Two weeks ago the Board ordered a well to be dug on the school site where a water trickle existed, and the little supply promptly went dry. Trustee Brooks then summoned A. Roelandt, famed as a water diviner, who picked a site ten feet distant from the vanished supply.

Then he hastened to Giles Road for Herbert Young, another master of

the willow twig, who picked a site and declared ten feet would be the depth. The site was that earlier selected by Mr. Roelandt. Well diggers were then put to work, but when down eight feet there was no sign of the promised water when Trustee Brooks made one of his many daily visits. He then brought John Sarup on the scene and was assured the water would surely develop.

To Victor Butler, the youngest of the well-diggers, went the honor of bringing in the well. An accident in bringing in the pipe caused the well to start the flow, which comes from a black sand in a clay bed ten and one-half feet below the surface.

Interment will be in Ross Bay Cemetery.

The remains of Archibald Belmont Orr, who passed away on Saturday, were laid to rest yesterday afternoon at the Ross Bay Cemetery. The service was conducted at Hayard's B.C. Funeral Chapel at 1 o'clock. Rev. J. S. A. Bastin officiating in the presence of a large congregation of sorrowing friends. Many beautiful flowers covered the casket. Interment was in Royal Oak Burial Park. The pallbearers were Major Dick, H. A. Wright, S. Yates, J. Smith, J. A. Kenner, and T. F. Speed. Orr was seventy-six years of age and leaves one son, Thomas of Skewell, Cornwall; England; and five daughters, Mrs. V. C. Morris and Mrs. Bill Cartwright of Salt Spring Island, Mr. Hutchinson of Devonshire, England, Mr. Thompson in Victoria, and Miss Ethel Lang in Victoria.

Autoist Hurt and His Wife Believed Killed

Lillooet, B.C., Aug. 19.—His car consumed by flames, having crashed over the Ostrander Hill bank on the Fraser River, M. Fraser of Cassidy was found unconscious by Indians, while his wife, who was with him, is believed drowned.

Fraser and the wreckage of the car were not found until early yesterday evening, though it is surmised the accident must have occurred some six hours previously.

Fraser and his wife were found in a semi-conscious condition after being first aid, was unable to tell police and searchers what had happened, or what had become of Mrs. Fraser.

NEWS IN BRIEF

M. Andrews, of the freight department of the C.P.R., Vancouver, accompanied by Mrs. Andrews is in the Empress Hotel.

Dr. W. P. Remington, Bishop of Eastern Oregon, will be the preacher at 10:30 service next Sunday morning at St. Paul's Garrison Church, Esquimalt.

Dan McKenzie, found by police in a lot on Princess Avenue in an injured condition, was taken to hospital to-day with a fractured shoulder. His injuries, it is believed, were caused by a fall.

When a Foul Bay street car split points at the intersection of Cook and Port Streets late yesterday afternoon service was set up temporarily until the service men placed the car back on the right tracks.

"Empire Problems" will be the subject of the address by the Bishop of London before the Canadian Club at its luncheon in the Empress Hotel on Friday evening. It was learned by John Cochran, chairman of the speakers' committee of the club. The dinner will commence at 6:30 o'clock.

Entries close Friday for the Provincial Fall Fair at the Willows, which opens August 31, is pointed out to-day by the secretary, W. H. Mearns. A horse show will also be held, according to Mr. Mearns, in urging those who have not yet filled in entry blanks and intend to compete to send them to the offices of the B.C. Agricultural Association in the Sayward Building at once.

Among the visitors who arrived from the south this morning for a few days here are: Mr. and Mrs. Henry Fischer and their daughters from Seattle; Mr. and Mrs. Max L. Gray from Chehalis, Wash.; Mr. and Mrs. V. O. Clapp, Mr. and Mrs. B. H. Lewis from Seattle; Miss Hattie Williams from Portland; Mr. and Mrs. W. D. Smith from Pasadena; Mr. and Mrs. C. M. Jordan from Orange, Cal., and R. E. Morgan from San Antonio.

At the regular monthly meeting of the Tuberculosis Veterans section of the Canadian Legion, yesterday evening a communication from Lieut.-Governor J. W. Fordham Johnson was read in which he stated his pleasure in accepting the office of honorary president of the section. Letters of appreciation to the Ladies' Auxiliary, T.V.C., Lake Hill Women's Institute and to Joe Noden for his work in connection with the men's tag day were ordered read. The results of the tag day were very gratifying, and the association wishes to thank the public for its generous support. A review of the work of the committee proved interesting, and showed that the assistance of the association in preparing cases for the chess disabled is still sorely needed.

The following programme has been chosen by Bandmaster James Miller for the band concert by the First Battalion, Canadian Scottish Regiment, in B.C. Hill Park this evening, commanding it is understood: "Quintet Plus" (Jewell); selection, "Gem of the Forest" from Victor Herbert, arranged by Lake Vale, "Amorette" (Auber); intermezzo, "Brave Horse" (Auber); intermezzo Elegante from "Tales of Hoffman" (Offenbach); "Czardas"; "Dances of the Opera," "Ghost in the Woods" (Grossmith); intermezzo (Arranged); "Wedding of the Rose" (Jessel); humoresque, "Comin' Through the Rye" (Douglas); grand selection, "Songs of Ireland" (Douglas).

Port Alberni Houses To Be Renumbered

Special to The Times

Port Alberni, Aug. 19.—The city council sold two lots and accepted an arrangement with the school board by which school grounds, earmarked for the future, will be used for a reservoir to drain for the new school area.

An offer was accepted from a private firm by which, in exchange for permission to sell number plates in the city, the firm will repaint the numbering system of the houses.

Special regulations are to be adopted to regulate the privilege of erecting wooden awnings over city sidewalks.

The missing bricks from the city incinerator, are still to be the object of search, and it was decided to buy parts necessary to place the air compressor back in the incinerator.

Mr. and Mrs. Clifford Richards and their two-year-old son of Spokane, who were in the hotel when the fire broke out, were in the hotel at the time.

Mr. and Mrs. Clifford Richards and their two-year-old son of Spokane, who were in the hotel when the fire broke out, were in the hotel at the time.

Miss Ann Staples, address unknown, occupying a hotel cottage.

Two nurses from Saskatchewan, whose names were not obtainable.

Miss Mary McEachern of Calgary, who managed to escape with her effects.

Others in the building were Harold Hopewell, grandson of Mrs. Hale; Mrs. Ruitan, a relative of Mrs. Hale, and the hotel staff.

FRIEND'S SAFETY

Mrs. Hale, proprietress, was on the beach when a little girl wading nearby saw blue smoke coming from the attic window in the east wing. As the smoke changed to crackling flame, Mrs. Hale ran toward the hotel, but collapsed.

On her recovery Mrs. Hale was mainly concerned for the safety of Mrs. Stewart, who was first reported missing.

According to a girl-witness of the fire, a dog was the sole casualty, being trapped by the blaze.

**NO PLAN YET
 TO REBUILD
 CADBORO HOTEL**

Beach Resort Destroyed By Fire Yesterday Valued at \$40,000

Mrs. Ida Hall, Proprietress, in Hospital; Many Guests Lost Clothing and Cash

**Ideas Offered
 To Beautify
 Capital City**

Suggestions Received From Victoria Citizens in Response to Request of Capital City Beautification Committee.

Suggestions for the beautification of Victoria as the capital city of British Columbia have been invited by the joint commission on beautification. The suggestions should be sent to George I. Warren, president of the Chamber of Commerce. Some more suggestions received by citizens follow:

AS IN MANCHESTER

"I put this suggestion to R. Haywood, M.P.P., a while ago. I know it is a big item, but it will pay off for the long run as a good revenue maker and solve a lot of unemployment."

"Why not make Beacon Hill Park into a place similar to Bellevue and the Zoological Gardens in Manchester. It would be a big expense, but it would be there for all time. In the first place a big lake with boats on would be necessary. Transformation scenery would be required for fire-works, fireworks, etc. After each all kinds of amusements, a monkey house, elephants for the kiddies to ride upon, a big building for choir festivals and band competitions should be included. In Manchester they hold about four band contests a year, besides choral contests.

"In winter the building could be made into an ice hockey arena. Something should be done on all the year.

"The cause of the fire is believed to have been a defective wire. This wire is used in the heating of a guest who had early in the day smelled smoke in her room, but had not connected it with smoldering timbers at the time.

LOST CLOTHING AND FUNDS

Many of the guests staying at the hotel were on the beach when the fire broke out at 2:30 o'clock. Before they could get to their rooms to save clothing and personal belongings the building was an impossible structure. Some of the guests were still swimming when the roof fell in. Girls and young men clad in bathing suits, and mothers of families, clustered on the lawn to windward of the blazing hotel and discussed their difficulties, many having lost substantial sums of money in addition to wardrobes. Desperate efforts by the volunteers to save as little of the hotel furniture as possible of the apparel of the guests were saved.

Cadboro Beach Hotel was built about twenty years ago and was insured for approximately \$20,000, with \$4,000 coverage for furniture. The property was purchased by Mrs. Hale three years ago, when she came to Victoria from Moose Jaw.

The cause of the fire is believed to have been a defective wire. This wire is used in the heating of a guest who had early in the day smelled smoke in her room, but had not connected it with smoldering timbers at the time.

PLAN TO USE SURPLUS WHEAT AS DOLE FOR UNEMPLOYED

Washington, Aug. 19.—Use of wheat stabilization stocks as emergency food relief this winter was proposed to-day by Sam R. McElveen of the Farm Board.

"Such use of the surplus grain supplies would avoid the aspects of a dole," he said.

HOOVER SEEKS TO MOVE FARM BOARD

The Federal Farm Board has received through the State Department and the

White House the inquiry of the Chinese government looking toward the purchase of stabilization wheat for relief of Yangtze flood sufferers.

Hoover's action is expected by the board, provided satisfactory terms can be arranged.

The fact that the report went to the Farm Board by way of the White House gave rise to reports that President Hoover would take a hand in the negotiations in an effort to get some action from the Farm Board.

To-day's Grain Markets

WINNIPEG

By Logan & Bryan

Winnipeg, Aug. 19.—Wheat: The wheat market was again dull, narrow and featureless with prices holding within a range of half a cent. New York reported a fair business worked overnight, particularly in Manitoba, with France the outstanding buyer, but there was no indication of this business in the local futures market and only a few odd lots were reported worked by local dealers. However, there was little more doing in the cash market and spreads were 1/4 to 1/4 better.

It is understood that at least 2,000,000 bushels of cash wheat has changed ownership this morning, the wheat being either at the port of the lakes or Montreal. Most of the wheat is said to have been taken by a large continental export house which would indicate that they either have it sold or have a market for it, and many feel that there is a larger trade going on than is being reported.

An official report states that wheat seeding in the American areas was practically finished and a decreased acreage is expected in most parts. The weather in Great Britain is very wet and in northwest is very unsettled. In Russia it is mostly fair, but cloudy in the east. Winnipeg futures closed 1/4 higher. Liverpool due 1/4 to 1/4 lower on Wednesday.

Coarse grains: Some small lots of barley were reported worked for export overnight and was reflected in the opening of the market. Otherwise there was very little doing in the coarse grains. Prices held fairly steady, there being very little pressure on the market.

Oats closed 1/4 lower to unchanged. Barley 1/4 higher to 1/4 lower and rye 1/4 lower.

Flax: Very quiet. No feature. Closing 1/4 lower to unchanged.

Ship, Rail and Aviation News

serious List Sends Yaye Maru to Dock in Esquimalt Harbor

ember Being Lightered This Morning and Surveyors
on Board to Ascertain Why Ship Developed Eighteen-degree List Coming Down From Vancouver

With a mysterious trouble, which will not be solved until some of the cargo is lightered and surveyors complete their reports, the Japanese freighter Yaye Maru was alongside the wharf at the government drydock in Esquimalt this morning, her outbound Orient voyage interrupted after loading in Vancouver.

The Yaye Maru arrived in the Royal Docks at the entrance to Esquimalt Harbor yesterday morning with a list, thought to have been caused by the ship's own cargo deck. She anchored, and all afternoon members of crew worked on the deck load, fitting it and joshing it securely.

The list continued, however, and needed to get worse, and early yesterday, the captain of the ship, communication with the offices of company in Vancouver decided to have the ship into Esquimalt. The ship is under power and is alongside the government wharf at noon. From Vancouver the list developed, by the time the vessel was tied in Esquimalt, had taken the previous angle of about eighteen degrees.

SHIPPING CARGO
At 8 o'clock this morning scows went up to Esquimalt and commenced unloading the ship's deck load, so that surveyors could ascertain what was wrong with the ship. The trouble was thought to be in the ship's chippy, and it is possible it may be broken, bent or ballast tanks. As the ship was taken off this morning the list suddenly listed to the other side, making the trouble even more perplexing.

A. Barnett, local representative of San Francisco Board of Marine Surveyors, and Alex Scott of Lloyd's in Vancouver and The King of the Orient, local shipping agents, were on board this morning. The ship will probably be repaired alongside the wharf, and will not have to put in the drydock.

The Yaye Maru is in tramp service in the Pacific Ocean, and had been to British Columbia ports several times. It was built in 1919 at the Harima shipyard in Kobe, and is registered at that port. It is owned by the Kusai Kisan Kaisha and chartered to various Japanese steamship companies.

She is registered at 6,761 tons, a length of 425 feet, a breadth of thirty-four feet, and a depth of thirty-six feet.

The United States' shipbuilding Restores alongside the outfitting wharf at Esquimalt for annual general overhaul and several odd jobs. She is put in the drydock a few days for exterior cleaning and painting, and will be in Esquimalt Harbor for 10 days or two weeks before she returns to her berth at the Rithet piers.

ICK JOB
A quick overhaul was given the P.R. steamer Princess Louise in the minimum Government drydock by the Drydock Limited yesterday. The ship was floated in at 8 o'clock yesterday morning, and came out at 5 p.m. in the afternoon, after survey and minor work. She left immediately for Vancouver and will sail from the Canadian port for Alaska at 9 o'clock in the evening.

EARL JELLIFFE OFF TO CANADA FOR CONFERENCE

Famous British War Lord Due in Montreal Saturday Aboard
S. Duchess of York

To Attend Navy League
Meetings and Will Open Toronto
Exhibition August 28

Vancouver, Aug. 19.—Admiral Earl Jellicoe, commander-in-chief of the navy during the war, sailed for Canada from Southampton August 15 aboard the Canadian Pacific liner Duchess of York, and due to arrive in Montreal Saturday, advised reaching J. F. Forster, steamship general passenger agent, said to-day.

Accompanied by a number of delegates to the fifth biennial conference of the British Empire Service Leagues, the former navy head is to open the Toronto Exhibition, August 28.

Toronto, inland headquarters of the Navy League of Canada, is to take on

Off to ancient ports of Dai Nippon, the Nippon Yusen Kaisha liner Yokohama Maru will sail from the Ogden Point piers about 6 o'clock this afternoon with a fair list of passengers and a capacity cargo of freight, destined to sail from Victoria 11 o'clock this morning. The Yokohama should arrive alongside the local docks about 5 o'clock to pick up light cargo, a few local passengers and mails.

Six steerage passengers will board the liner here before she puts to sea. They are Kojirō Deguchi, Mrs. A. I. Tanami, Miss Akiko Tanami, Unokichi Tanaka, Japanese, returning to their homes in the land of the rising sun for brief visits. Two Russian passengers will complete the list here. They are Stephen Slavinsky and Jacob Peter Krieger. They are both bound for Tokio.

Victoria, 8 a.m., Aug. 19.—The barometer is also at the Yenoo plant for some minor work. The Cruiser is being quite active this summer, and nearly every week-end the captain and members of his family and a party of friends are off on jaunts around the Gulf Islands or to Spanish Arm.

Heart of Liane

by MABEL MCCELLIOTT

The pavement of West 68th Street bounded under the soles of Liane Barrett's thin shoes as she crossed in the direction of the apartment building she called home. Tall it was, its dirty yellow brick facade laced with the unimaginable detail of innumerable fire escapes. Liane carried a limp paper bag in one hand and the other her left arm embracing a package containing lettuce, a few tomatoes and a jar of prepared salad dressing.

Up in the box-like room which served the Barretts as combination living and dining quarters the air had a dead, stifling quality. One of those much-needed naps had descended on the city, and descended on the city, before Park Avenues had even contemplated sending their down comforters to the cleaners. The women's magazines were already printing plenty of information about "lending that summer appearance" to city girls, but the Barretts had neither the time nor the money to squander on such refinements of living. The three-room flat which Liane shared with her mother was sketchily furnished with tables and chairs bought at auction rooms, most of them now disguised with curtains of old lace and muslin. It was a brave little place. The chintz at the windows hung rather dejectedly like a flag at half mast, but it was easy to see that, when new, its birds and butterflies had been gay. Soot and rain had wreaked a certain havoc on it.

Twilight had come and the young Vernon sat down, threw her red hat upon the disguised not bed, her bundles on the drooping table and herself into a wicker chair. She then announced, "Miss Barrett just now announced, 'I'm dead!' in a voice surprisingly vital."

Indeed, the girl looked amazingly alive in this exhausting day. Her bronze-sparkled hair allowed to grow shoulder length, was caught in an engaging knot at the nape of her neck. It curled and scalloped itself about a face the color of a sun-kissed peach. Her thin dress fitted her charmingly and, since it was sleeveless, lent an air of fictitiousness.

"I'm dead!" Liane continued, catching up her parcels and going into the kitchenerette. Here she surveyed with some distaste the sink, the tiny cupboard, the stove with its tiny burners, the battered oilcloth on the shelves. She longed for the Ritz and attentive waiters, for cool drinks in tall glasses—and she had this instead!

Her mother, sitting at an old-fashioned sewing machine in one corner of the living-room, looked up, sighed, and did not reply. Yards of seamstress material lay about her head, and as she pressed her foot with energy the motor hummed and the yellow stuff resolved itself into a costume. Cass Barrett's costume, in fact, for "The Mark of Man," a so-called highbrow drama playing that week at the New Art Theatre far up town.

Cass, forty-five years old, still slim, still faintly elegant. In a kindly light she could pass for thirty-five. Not at this exact moment, perhaps, in her faded blue dressing gown with her hair screwed up on top of her head so that the roots showed dark and shaky. No, Cass was out of school, and that to whom Cass had so astonishingly managed to send her all these years, and summer in the torrid small apartment stretched before them. Summer with no job in prospect, rent to pay, food to buy. No wonder Cass looked troubled. Her season at New Art was over.

She could hear Liane clattering in the kitchenerette. The tap hissed and sputtered, drawers were lustily opened and shut, cutlery clattered on an unseen tin tray. Presently Liane appeared in the doorway, balancing that tray on one hand in bunches of an inexperientiousness. She said, "Luncheon's served, mother," and put it down on the green table.

Cass pushed aside the billows of yellow cloth and got up stiffly. "Looks grand," she yawned, pulling up a shaky chair. "That's the last of the ice Liane contained, shoving a glass of tea. "I'll have to yell at Tony as I go by this afternoon."

"Don't say 'yell' precious," Cass demurred. She used the precise diction which usually caused her to be mistaken for an Englishwoman, much to her delight. She had been born in Syracuse.

Liane said, "I'll scream at him then."

"Liane, I hate to think of that long afternoon at Willoughby's," the girl went on. "My feet do ache so, and it is so hard to sell anything to the terrible women who are just looking!"

Her mother nodded in sympathy. "I know my pet. It's dreadful, but when Mr. Cronin spoke to me about the part-time work this week I thought we'd better snatch at it. After all, it's only afternoons and you can put by a bit of money for later."

"I know I ought to be glad of the chance to earn a little, but somehow I can't get excited about it."

"You ought to be having tennis and swimming and parties," Cass murmured resentfully. She spread her hands wide in an expressive gesture. "But what can one do about it?"

Cass went back to her machine as Liane scattered through the dishes. "Must have this finished by two," Cass announced.

When the girl came to say goodbye a few minutes later her mother looked at her admiringly. "That red thing's nice on you," she said of Molly Cronin's last year's print silk. Indeed, the reddish-brown by cold water was a brushing up, looking surprisingly cool and sweet. Cass sighed again as the young feet tapped down the four flights of stairs.

"A shame!" she murmured. The woman gathered up the finished robe and packed it into an oil suit box. She cold-pressed her face with religious care, made with a small brush, then brushed her tanned hair until it gleamed and pressed it into shining waves about her face. There, that was better! She spent five minutes massaging stubborn wrinkles from her eyes. She put on a thin dark dress that had a vaguely out-of-the-way and a year-old feel. Then she threw a cover of chiffon over the sewing machine and drew the shades nearly to the sill in an effort to thwart the inroads of the relentless afternoon sun. After that she went down into the baking street.

"Feeling the heat," she managed to mumble. If only she could keep from making a fool of herself before these people. Who was this Mrs. Cleesbaugh, she, a whimsical lady, had decided to take on for the afternoon.

In the subway she maneuvered it so that it just missed the knees of the perspiring fat man who stood in front of her, swaying as the train shot around. The subway was fairly cool these first few days of August, but Cass had to work its way down under ground and settle for the season. How fresh that girl across the way looked in her pale dress and summer shoes! Something like that Liane should be wearing, instead of Molly Cronin's kind castoffs.

Summer is the time, Cass mused, when one needs money more than ever. In winter it's hard to keep warm. And cheap food is a good investment then. It is when days are hot and nights stifling that one wants crisp, alluring food to eat. One wants to dine on a roof, high up, with a view of the river. Oh! sighed Cass, for the millionth time in her life, how difficult it is to be poor. And that's what it is.

She had pinned for herself such as linen sheets, changed every day, for English cologne to rub on her burning skin, for sheer stockings and thin, fine underthings. All this she desired not so much for herself as for Liane.

After the darkness and chills of the underground, the heat of the asphalt was a shock to her system. She traversed the few steps to the stage door feeling actually giddy. "I'm not going to be able to stand many more seasons of this," Cass thought prophetically. "My heart's not what it used to be." She felt a chill of fear. "I'm not... And then, what about Liane?"

Liane with all the world before her, Liane, large-eyed, trusting, and eighteen. Cass Barret knew that world well enough to feel that a young girl should not be required to fight it alone.

Nevertheless, she entered the stage door with a smile on her lips. It was the smile of the good trouper. Besides, worry made one look old. That was the one thing Cass could not afford to do.

Rehearsal had not yet started. She was to be early and have time to catch her breath in the dusty coolness. "Get your coat on," finished chirped Elsie Minnie, the ingenue who stood in the wings greedily making away with an ice cream cone. Cass opened the box, shook out the yellow folds. "Why, it's lovely," Elsie admired. "You've got the—I don't know—the feeling!"

Cass smiled back at her. She liked Elsie. The little thing seemed friendly.

She could hear Liane clattering in the kitchenerette. The tap hissed and sputtered, drawers were lustily opened and shut, cutlery clattered on an unseen tin tray. Presently Liane appeared in the doorway, balancing that tray on one hand in bunches of an inexperientiousness. She said, "Luncheon's served, mother," and put it down on the green table.

Cass pushed aside the billows of yellow cloth and got up stiffly. "Looks grand," she yawned, pulling up a shaky chair. "That's the last of the ice Liane contained, shoving a glass of tea. "I'll have to yell at Tony as I go by this afternoon."

"Don't say 'yell' precious," Cass demurred. She used the precise diction which usually caused her to be mistaken for an Englishwoman, much to her delight. She had been born in Syracuse.

Liane said, "I'll scream at him then."

There were so many cliques in the New Art. So much jealousy. You never knew who your friends were, but Elsie appeared to be one.

Cass had been with the New Art for three seasons now. It was not exciting, a sort of stock company really. But it was safe and sure. It meant bread and butter for nine months of the year. She was grateful for that. She hoped, she would be asked to come back next season, but well, she didn't know.

"Liane, I hate to think of that long afternoon at Willoughby's," the girl went on. "My feet do ache so, and it is so hard to sell anything to the terrible women who are just looking!"

Her mother nodded in sympathy. "I know my pet. It's dreadful, but when Mr. Cronin spoke to me about the part-time work this week I thought we'd better snatch at it. After all, it's only afternoons and you can put by a bit of money for later."

"I know I ought to be glad of the chance to earn a little, but somehow I can't get excited about it."

"You ought to be having tennis and swimming and parties," Cass murmured resentfully. She spread her hands wide in an expressive gesture. "But what can one do about it?"

Cass went back to her machine as Liane scattered through the dishes. "Must have this finished by two," Cass announced.

When the girl came to say goodbye a few minutes later her mother looked at her admiringly. "That red thing's nice on you," she said of Molly Cronin's last year's print silk. Indeed, the reddish-brown by cold water was a brushing up, looking surprisingly cool and sweet. Cass sighed again as the young feet tapped down the four flights of stairs.

"A shame!" she murmured. The woman gathered up the finished robe and packed it into an oil suit box. She cold-pressed her face with religious care, made with a small brush, then brushed her tanned hair until it gleamed and pressed it into shining waves about her face. There, that was better! She spent five minutes massaging stubborn wrinkles from her eyes. She put on a thin dark dress that had a vaguely out-of-the-way and a year-old feel.

Then she threw a cover of chiffon over the sewing machine and drew the shades nearly to the sill in an effort to thwart the inroads of the relentless afternoon sun. After that she went down into the baking street.

"Feeling the heat," she managed to mumble. If only she could keep from making a fool of herself before these people. Who was this Mrs. Cleesbaugh, she, a whimsical lady, had decided to take on for the afternoon.

"Yes," agreed Mrs. Longtail. "It is. And when Jollie and Jillie come home I am going to tell them so and I'll make them play some games to stop Squeakie Eekie from crying."

"Well and good," said Uncle Wiggily laughing a little. "But that will not

BEDTIME STORY

Uncle Wiggily's Paper Hat

By HOWARD R. GARIS

Once upon a time, as Uncle Wiggily was hopping past the little hole house where Jollie and Jillie Longtail lived, the rabbit gentleman heard a cry like this:

"Wee! Wee! Wee!"

"Dear me!" said Uncle Wiggily stopping so quickly that he nearly bumped into his pink, twinkling nose. "There must be something sad in the mouse-house." For the cry had come from inside the Longtail home and the Longtails were a family of mice who were good friends of Uncle Wiggily. Jollie and Jillie, a boy and girl mouse, had been taken to live with the old rabbit gentleman.

"I wonder who is crying now?" said Uncle Wiggily, looking out loud to himself as he stood in front of the mouse-house. "It is Jollie or Jillie?"

"It is neither one, if you please," answered the voice of Mrs. Longtail, the mouse lady mother.

"Then, who is crying?" asked Uncle Wiggily.

"It is Squeakie Eekie, the cousin mouse," said Mrs. Longtail. "The cousin mouse has come to visit Jollie and Jillie and it is Squeakie Eekie whom you hear crying."

"It is neither one, if you please,"

boomed presently. "As you all know, we have no time to waste with the old mouse lady mother."

"Because

ENO's "Fruit Salt" is recognized by the people of every nation as the finest, safest, and most pleasant laxative aid to good health.

Why there is no substitute for ENO

Because

ENO is non-habit forming, therefore quite safe for anyone to use.

ENO FOR CONSTIPATION.

Because

ENO first thing every morning is the natural way to ensure internal cleanliness—to eliminate waste matter which causes acid poisoning and intestinal toxicity. **ENO FOR CONSTIPATION.**

Because

ENO contains only those ingredients which are acceptable to all systems—no purgative mineral salts, no sugar, no flavoring matter.

ENO FOR CONSTIPATION.

Because

ENO has triumphed over every test of time and usage—for over sixty years it has been the standard saline laxative.

RID YOURSELF OF CONSTIPATION.

Because

ENO has many imitators but No Rival

ink How Much Misery It Would Save If There
Were a Marriage Bureau in Every Community—
The Only Trouble Being That We All Want to
Pick Out Our Own Mates by Our Own Hunches

FAMOUS social service worker thinks that a marriage bureau should be established in every community to which young people could go for advice in selecting their mates, and for expert advice about how to make marriages successful. It is a great idea but, alas, impractical for lovers never listen to the voice of wisdom and experience. Millions of friends and relatives have heard all of the high gods of precedent reason and logic in a fruitless effort to convince young couples that it is folly to rush into matrimony before they had any way to support a family. They went along and got married just the same—in the fond belief that they would be fed on manna in heaven.

Millions of parents have talked their tongues off trying to convince their sons that they would bring down certain misery on their heads if they married shrewish, shiftless, extravagant, pleasure-mad girls, but their arguments never kept one youth from marching to the altar with his pretty little virago or waster and spender.

Millions of fathers and mothers have begged and prayed and beseeched their daughters not to wreck their lives by marrying drunkards or rogues or rascals, but the girls turned a deaf ear to their parents' warning and duly crashed into their fate in white satin and tulle.

The trouble is that when young people are in love they are the victims of a temporary insanity that makes them incapable of thinking straight, seeing straight or of counting the consequences of what they do. Doubtless this is a good thing, for there certainly would be very few marriages if people figured out the risk they run in tying up with a strange woman or man for life or if they contemplated the many drawbacks to marriage as they would the bad points in a business deal.

Every engaged couple believe that their marriage is going to be different from all other marriages and that somehow the power to work-miracles and a little love they marry from what they are into what they want them to be going to be vouchsafed them on their wedding day. John knows that she is high-tempered, but he is sure that when she is married to him she will turn into a mild and sweet-tempered angel.

Tom knows that Sally is clothes-crazy and that she spends all of the money on her back and the beauty shops, while her poor old mother goes around looking like a human rag-bag and does all of the housework so that Sally won't spoil her pink, manicured nails, but he has never a misgiving that as soon as she is married to him she will be willing to wear basement bargain-counter frocks and get up and get reakfast.

Maud knows that Algernon is soured to the guards half the time, but she is confident that as soon as she marries him he will never thirst for liquors again. Gertrude knows that Percy is a lazy loaf who lets his mother work and support him, but she is firmly convinced that the minute she marries him he will become a hustler and a go-getter.

And so they are married and the fairy tale doesn't come true. The couple doesn't work. There is no metamorphosis of personalities that suddenly makes the weak strong, the bad good, the extravagant thrifty, the vile-tempered amiable. What John and Mary and Algernon and Gertrude were before marriage they are afterwards. Only more so. For marriage seems somehow to intensify our qualities and set them as a gordian does dyed.

But you couldn't convince any boy and girl in love of this, not though you spoke with the tongues of men and of angels and not though you had a whole house full of statistics to back you up. In fact, they don't need any of these, but it hasn't shaken their faith in their being an exception to the general rule.

However, one likes to toy with the idea of how much good such an institution as a matrimonial bureau could do, provided young people would accept its guidance. Fancy the number of unhappy marriages and divorces it would prevent if, instead of popping the question to a girl because she was pretty or cute or was blonde, a young man laid his case before the bureau and had it analyzed and got scientific advice on the subject as to how harmoniously the girl prospect's temperament would jibe with his and whether she would make him the sort of wife he needed or not.

And think how much misery it would save if husbands and wives could go to the bureau diagnose their troubles and find what ailed them and perhaps a woman, up on her housekeeping or soft-pedal her nagging or speed a man on his love-making.

Great idea, this of having a matrimonial bureau. But the trouble is we all want to pick out our husbands and wives by our own hunches and to commit our own follies in matrimony.

THROUGH HALLEY'S COMET
The rocket which was carrying seven live human beings into the depths of space, far beyond the farthest planet, is equipped to provide air for breathing as well as a place to eat. With a length of 1500 feet, the rocket stained space for growing plants, ice for stores of all sorts and for chimes of all sorts.

There was a general laugh, but beneath the laugh was a strain of serious thought. Who could say that the people on the rocket would ever be able to transmit a message to earth? Perhaps they would go on and on and never find a planet on which to rest. Even if they did find such a planet, they might not be able to arrange for the kind of a takeoff they needed to start their return trip.

An hour later came the noise of objects striking the shell of the rocket. Madeline and Paul were afraid, but professor Richardson calmed them, saying:

"We are now passing through the comet. The noises you hear are made by small objects hardly larger than footballs. Millions of such objects are present in a large comet. The shell of this comet is very strong, however, and we shall not be harmed."

That's What Counts
"You!" came her scornful reply.
"You want to marry me?"
"Yes," murmured the lover.
"But, my dear boy, she went on, we've only known me three days."
"Oh, much longer than that," he replied.
"I've been two years in the bank where your father keeps his account."

PRIMA DONNA PLAYING LEAD AT DOMINION

Margaret Schilling, Stage
Favorite of N.Y., Stars in
"Children of Dreams"

One of the youngest prima donnas of the stage or screen, Margaret Schilling, who plays the leading role in Warner Brothers' feature production, "Children of Dreams," now at the Dominion Theatre, has never struggled for success.

When Sigmund Romberg and Oscar Hammerstein II started their search for a prima donna for their second Warner Brothers' production, they listed Miss Schilling as the first choice if she should be free. It happened that she was and she was brought to Hollywood for the filming of "Children of Dreams" her first feature picture role.

Miss Schilling is only twenty-one years old. She was born in New York City and attended the public schools and Hunter College. Her latest stage role was the lead in "Strike Up the Band," which she accepted just before the production opened and in which she was an overnight hit.

Miss Schilling is small and slight for a singer, but her voice has a peculiarly fine recording quality which made her tremendously popular on the radio and which is transferred perfectly to the screen.

Following the completion of "Children of Dreams," Miss Schilling returned to New York and her stage career, but she will without doubt be seen often in pictures in the future.

Crystal Garden—Swimming, Dancing and Miniature Golf.

lakes which formerly existed in this region.

The result was that immense deposits of salt and soda, as well as other chemicals, including gold, were left. The famous "20 Mule Team" borax caravans from Death Valley used to make this region their headquarters.

COLISEUM THEATRE

In "Tons of Money," now showing at the Coliseum Theatre, Yvonne Arnaud's fascinating career and her sense of fun are a splendid foil to the "silly fun" meanderings of Ralph Lynn. She is one of the most charming pieces of humanity who has ever graced the screen. Her irresistible appeal cannot be described adequately. Her smile, her delicious roughness, her delightful mannerisms, her charming broken accent, and her complete artistry will put her among the foremost favorites of the screen.

COLUMBIA THEATRE

Robert Chisholm, who plays a featured singing role in "Lottery Bride," now showing at the Columbia Theatre, is Arthur Hammerstein's New York stage production for five years. When the impresario arranged to produce musical dramas for United Artists he took Chisholm from the stage cast of "Sweet Adeline." "Lottery Bride," directed by Paul L. Stein, is Chisholm's first appearance on the screen. He sings a number of magnificent songs composed by Rudolf Primi.

PLAYHOUSE THEATRE

Tom Moore, playing a featured role in James Cagney's latest production for Sono Art-Wide "Costello Case," now being shown at the Playhouse Theatre, is one of a famous trio of stage and screen brothers. The other popular members of the family, each of whom has won a place of prominence in the screen world, are Owen and Mat Moore.

Tom was born in County Meath, Ireland, and when he was still a youngster his family moved to Toledo, Ohio. Chicago was the next place of residence of the Moores, and it was here that Tom received his education.

COMING TO COLISEUM

The London Daily Mirror says of "On Approval," which will be shown at the Coliseum for one week, starting Saturday next: "It definitely places Tom Walls on a pinnacle as a talkie comedy star and once again proves that the British actor is second to none in his art. How pleasant it is to hear the English voice on the screen and to see a country-house setting properly staged. 'On Approval' is another, British

success."

Interesting Talks Planned For Meeting of Local Society

Subjects of unusual interest are listed for discussion at meetings of the Victoria centre of the Royal Astronomical Society of Canada during the next few months.

A symposium on finding the distance of the stars is planned for September 29, the various methods being by trigonometry, by parallactic motions, the cepheid variable method, galactic rotation, and other astronomical means.

James Duff, M.A., Dr. Frank Hogg and F. H. Hughes, Musc. Bac., will be the speakers.

Before returning to the east, R. M. Peirce, M.A., of the Detroit University, will give a talk on astronomical instruments on August 27. Observations with a four-inch telescope will be made.

The Astronomy of Poets," by W. E. Harper, M.A., on October 27 and the annual meeting on November 24, when Dr. C. S. Beale will talk on "Distant Universes," are also fixed.

Before returning to the east, R. M. Peirce, M.A., of the Detroit University, will give a talk on astronomical instruments on August 27. Observations with a four-inch telescope will be made.

The Astronomy of Poets," by W. E. Harper, M.A., on October 27 and the annual meeting on November 24, when Dr. C. S. Beale will talk on "Distant Universes," are also fixed.

Before returning to the east, R. M. Peirce, M.A., of the Detroit University, will give a talk on astronomical instruments on August 27. Observations with a four-inch telescope will be made.

The Astronomy of Poets," by W. E. Harper, M.A., on October 27 and the annual meeting on November 24, when Dr. C. S. Beale will talk on "Distant Universes," are also fixed.

Before returning to the east, R. M. Peirce, M.A., of the Detroit University, will give a talk on astronomical instruments on August 27. Observations with a four-inch telescope will be made.
